cultural practices such as stick fighting and Carnival as well as religious rituals and beliefs like Vodou and Myal have played in efforts to reshape the novel form In so doing it provides an original perspective on the importance of these practices with their emphasis on bodily movement to the development of new philosophies of history Beginning in the post WWII period when optimism surrounding the possibility of social and political change was at a peak The Caribbean Novel since 1945 interrogates the trajectories of various national projects through to the present It explores how the textual histories of common motifs in Caribbean writing have functioned to encode the fluctuating fortunes of different political dispensations The scope of the analysis is varied and comprehensive covering both critically acclaimed and lesser known authors from the Anglophone Francophone and Hispanophone traditions These include Jacques Roumain Sam Selvon Marie Chauvet Luis Rafael Sanchez Earl Lovelace Patrick Chamoiseau Erna Brodber Wilson Harris Shani Mootoo Oonya Kempadoo Ernest Moutoussamy and Pedro Juan Gutierrez Mixing detailed analysis of key texts with wider surveys of significant trends this book emphasizes the continuing significance of representations of the nation state to literary articulations of resistance to the imperialist logic of global capital Development in Suspense Norman Girvan, George L. Canterbury, 2018-05-15 The large scale extraction of natural resources for sale in capitalist markets is not a new phenomenon but in recent years global demand for resources has increased leading to greater attention to the role of resource extraction in the development of the exporting countries The term neoextractivism was coined to refer to the complex of state private sector policies intended to utilize the income from natural resources sales for development objectives and for improving the lives of a country's citizens However this book argues that neoextractivism is merely another conduit for capitalist development reinforcing the position of elites with few benefits for working people With particular reference to the role of neoextractivism within Latin America and the Caribbean using Guyana as a case study the book aims to provide readers with the tools they need to critically analyze neoextractivism as a development model identifying alternative paths for improving the human condition This book will be of interest to academics and students in the fields of international development political economy sociology and globalization as well as to policymakers and political activists engaged in social movements in the natural resources sector Globalization, Negotiation, and the Failure of Transformation in South Africa Michael H. Allen, 2006-07-21 The book explains the social forces forms of consciousness and structural constraints that undermined Apartheid preserved national unity and yet later constrained democratic sovereignty as the imperatives of global markets clashed with the prior aspirations of the democratic revolution Guyana: from Slavery to the Present Ramesh Gampat, 2015-04-15 It is common knowledge that slavery and indenture were characterized by long hours of physical labor restriction of movement and other basic human freedoms and severe punishment for violations of draconian labor laws Less well known is the fact that nutrition was very deficient and a range of infectious diseases maimed debilitated and killed on a large scale In trying to narrow the knowledge gap with respect to Guyana Ramesh Gampat shows that extremely poor sanitary conditions hygiene and nutrition hastened infections and created a vicious cycle The British protected its own soldiers officials and colonists by establishing a medical enclave that lasted until Emancipation in 1838 Former slaves were

quarantined to neglected and decaying villages and Indians to plantations Concern with health conditions appeared only during periods of epidemics and even then it was essentially for the protection of Europeans Colonial medicine opened the way for stereotyping labeling racialization of disease neutralization of potential leaders in the struggle for justice and crystallization of the view that Europeans were superior to Blacks and Indians Shorter stature and life expectancy are good indications that slaves and indentured immigrants fared considerably less well than Europeans Several infectious diseases sickened and fell Blacks and Indians including malaria and undefined fevers pneumonia and bronchitis diarrhea and enteritis tuberculosis pneumonia and hookworm The conquest of malaria in the early 1950s initiated the epidemiological transition from communicable to chronic diseases and today NCDs account for some three quarters of all deaths in Guyana Malaria has reemerged fueled by a gold boom that consumes huge amount of mercury The potentially adverse public health consequences of the trio have been neglected
