The Positivist Science Of Law Avebury Series In Philosophy:

The Positivist Science of Law Keekok Lee,1989 Philosophy and Revolutions in Genetics Keekok Lee,2016-01-03

The last century saw two great revolutions in genetics the development of classic Mendelian theory and the discovery and investigation of DNA Each fundamental scientific discovery in turn generated its own distinctive technology Biotechnology is the offspring of the latter and is expected to be the driving force behind economic growth in the twenty first century These two case studies enable the author to conduct a philosophical exploration of the relationship between fundamental scientific discoveries on the one hand and the technologies that spring from them on the other As such it is also an exercise in the philosophy of technology **Philosophy of Law** Mark Tebbit,2017-01-20 Philosophy of Law An Introduction provides an

ideal starting point for students of philosophy and law Setting it clearly against the historical background Mark Tebbit quickly leads readers into the heart of the philosophical questions that dominate philosophy of law today He provides an exceptionally wide ranging overview of the contending theories that have sought to resolve these problems He does so without assuming prior knowledge either of philosophy or law on the part of the reader The book is structured in three parts around the key issues and themes in philosophy of law What is the law the major legal theories addressing the question of what we mean by law including natural law legal positivism and legal realism The reach of the law the various legal theories on the nature and extent of the law s authority with regard to obligation and civil disobedience rights liberty and privacy Criminal law responsibility and mens rea intention recklessness and murder legal defences insanity and philosophies of punishment This new third edition has been thoroughly updated to include assessments of important developments in philosophy and law in the early years of the twenty first century Revisions include a more detailed analysis of natural law new chapters on common law and the development of positivism a reassessment of the Austin Hart dispute in the light of recent criticism of Hart a new chapter on the natural law positivist controversy over Nazi law and legality and new chapters on criminal law extending the analysis of the dispute over the viability of the defences of necessity and duress The

Philosophical Foundations of Modern Medicine K. Lee,2011-12-02 An exploration of the philosophical foundation of modern medicine which explains why such a medicine possesses the characteristics it does and where precisely its strengths as well as its weaknesses lie Written in plain English it should be accessible to anyone who is intellectually curious lay persons and medical professionals alike The Philosophical Foundations of Classical Chinese Medicine Keekok Lee,2017-05-04 This

book makes Classical Chinese Medicine CCM intelligible to those who are not familiar with the tradition many of whom may choose to dismiss it off hand or to assess it negatively Keekok Lee uses two related strategies arguing that all science and therefore medicine cannot be understood without excavating its philosophical presuppositions and showing what those presuppositions are in the case of CCM compared with those of biomedicine Such excavations enable Lee in turn to demonstrate the following theses 1 the metaphysical ontological core of a medical system entails its own methodology how to

understand diagnose and treat an illness disease 2 CCM rests on process ontology is Wholist its general mode of thinking is Contextual dyadic its implicit logic is multi valent its model of causality is non linear and multi factorial 3 Biomedicine in the main rests on thing ontology and dualism is Reductionist its logic is classical bi valent its model of causality is linear and monofactorial 4 hence to condemn CCM as unscientific pseudo scientific plain mumbo jumbo while privileging Biomedicine as the Gold Standard of scientificity is as absurd as to judge a cat to be inferior to a dog using the criteria of goodness embodied in a dog show

Explorations in Knowledge, 1990 **Social Philosophy and Ecological Scarcity** Keekok Lee, 2019-09-18 Originally published in 1989 Social Philosophy and Ecological Scarcity presents a systematic study of the implications of ecological scarcity for social philosophy The book argues for a new social philosophy based on a conception of the good society and the good life which makes fewer rather than more demands on scarce ecological resources The book shows that the two major competing social philosophies in modern philosophical thought the bourgeois liberal and the state socialist are both forms of capitalism Despite their obvious differences they both pursue the logic of capitalism of ever increasing accumulation growth and consumption This pursuit is carried out by means of modern science and its technology which assume that Nature s resources are inexhaustible and can be exploited to meet infinite human wants or needs ignoring ecological scarcity The recognition of ecological scarcity would lead to a social philosophy based on a frugal mode of socialism which has more affinities with the social visions of Fourier and Morris than with that of Marx Their theories far from being too utopian are shown as more realistic and less fantastic than either bourgeois capitalism or state capitalism based on the Marxist model

[The British National Bibliography](#) Arthur James Wells, 1968 **Classical Chinese Medicine** Keekok Lee, 2018-07-26 This volume completes a trilogy Lee 2012 2017 on the philosophy of medicine Western and Chinese Its immediate prequel Lee 2017 sets out in general outline the philosophical and methodological core of Classical Chinese Medicine CCM this volume fleshes out that skeleton by examining in detail its peculiar concepts and characteristics such as Getihua Personalised Medicine Preventive Medicine Tianren xiangying Macro Micro cosmic Wholism Zh ng Fang Wholism Wholism at the level of diagnosis and treatment and Mind Body Wholism the person as primitive concept CCM is here shown to instantiate ecosystem science which is post Newtonian in orientation departing from familiar Newtonian landmarks such as Reductionism and linearity resting on thing ontology for a non reductionist non linear science This approach highlights a rich irony and paradox namely how CCM in being backward looking relying on classical texts as foundational texts and prescriptions of some two thousand years standing simultaneously manages to be at the cutting edge of scientific thinking today

Automation of Legal Reasoning P. Wahlgren, 1992-10-07 This book provides an analysis of the development which has lead up to the formation of a joint field of artificial intelligence and law It discusses the basic foundations and also addresses the future prospects of the discipline The author formulates a design approach for advanced Artificial Intelligence systems for law and concludes with a discussion about the potentialities and the consequences of future

development The Natural and the Artefactual Keekok Lee,1999-01-01 In this book philosopher Keekok Lee challenges one of the central assumptions of contemporary environmentalism that if we could reduce or eliminate pollution we could save the planet without unduly disrupting our modern industrialized societies Lee argues instead that the process of modernization with its attendant emphasis on technological innovation has fundamentally transformed nature into just another manmade artefact Ultimately what needs to be determined is if nature has value above and beyond human considerations whether aesthetic spiritual or biological This provocative book attempts to reconfigure environmental ethics positing the existence of two separate ontological categories the natural and the artefactual Natural entities be they organisms or inert matter are morally considerable because they possess the ontological value of independence whereas artefacts are created by humans expressly to serve their own interests and ends *Current Publications in Legal and Related Fields* ,1990 Selected Acquisitions Robert Crown Law Library,1989 Looking for Love in the Legal Discourse of Marriage Renata Grossi,2014-09-01 This book examines the in visibility of romantic love in the legal discourse surrounding modern Australian marriage It looks at how romantic love has become a core part of modernity and a dominant part of the Western marriage discourse and considers how the ideologies of romantic love are or are not replicated in the legal meaning of marriage This examination raises two key issues If love has become central to people s understanding of marriage then it is important for the legitimacy of law that love is reflected in both the content and application of the law More fundamentally it requires us to reconsider how we understand law and to ask whether it is engaged with emotions or separate from them Along the way this book also considers the meaning of love itself in contemporary society and asks whether love is a radical force capable of breaking down conservative meanings embedded in institutions like marriage or whether it simply mirrors them This book will be of interest to everyone working on love marriage and sexuality in the disciplines of law sociology and philosophy **International Encyclopedia of the Social & Behavioral Sciences** Neil J. Smelser,Paul B. Baltes,2001 The largest work ever published in the social and behavioural sciences It contains 4000 signed articles 15 million words of text 90 000 bibliographic references and 150 biographical entries *The Philosopher's Index* ,1995 Vols for 1969 include a section of abstracts *A Political Theology for the US-Mexico Borderlands* Bryan M. Ellrod,2025-03-13 Since 1994 over 4 000 human remains have been recovered from the Sonoran Desert Victims of a border enforcement strategy that weaponizes the landscape against migrants the ever growing ledger of the dead counts the human cost at which the present political paradigm is secured Through a series of readings of biblical texts informed by philosophical theological and legal theory this book facilitates a reckoning between the self determining polity and the excluded outsider s ethical demand Finding in their demand the motivation for novel forms of legal interpretation and political agency Ellrod sketches a hopeful life affirming alternative to Realist Political Theologies of Migration *The Legal-rational State* Keekok Lee,1990 *Environmental Ethics* ,1996 **Becoming Criminal** D. Crewe,2013-05-14 This book consists of a fundamental deconstruction and

reconstruction of the key concepts of Criminology and The Sociology of Law providing a coherent expression of the relationships between these newly constructed concepts and thus a radically new statement of the relationship between society crime and the law
