by some Gulf states from 2018 to 2022 resulted in a reduction of market power an additional benefit beyond increasing fiscal space While policymakers should continue to use available regulatory levers to achieve economic efficiency and a level playing field VAT could be considered as an alternative instrument

that the varieties of physical violence against women for which the Middle East is notorious honor killings obligatory beatings female genital mutilation are merely eruptions of an ethos of psychological violence and the threat of physical violence that pervades gender relations in the Middle East Ghanim documents and analyzes the complementary roles of both sexes in sustaining the system of violence and oppressive control that regulates gender relations in Middle Eastern societies He reveals that women are not only victims of violence but welcome the opportunity to become perpetrators of violence in the married female life cycle of subordination followed by domination The mother in law plays a crucial role in supporting the structure of patriarchal control by stoking tensions with her daughter in law and provoking her son to commit sanctioned violence on his wife The author applies his deep analysis of gender and violence in the Middle East to illuminate the motivational profiles of male and female political suicidalists from the Middle East and the martyrological adulation that they are accorded in Middle Eastern societies
