Polski, 2008-09-09 Lessons from the Cutting Edge of Neuroscience Remapping to Thrive in the New Global Economy Do you ever wonder how you think If you do this book will fascinate and inform you If you don't you will after reading this book Either way you'll enjoy learning how we don't usually do it as we think we do how we may do it better for that very reason and how we may do it still better once we understand Thomas C Schelling 2005 Nobel Prize Laureate in Economics Distinguished University Professor Emeritus University of Maryland Drawing on cutting edge research in the neurosciences Wired for Survival illuminates the surprising security implications of rapid change in the emerging economies and develops practical technically sound ways to face the challenges of global change Researcher and consultant Margaret M Polski begins by uncovering the remarkable neurobiological underpinnings of policy Polski reveals why the most effective political and economic policies are codified not in law treaty or culture but in the networks embedded in our bodies and brains and how protecting our prosperity requires us to adapt those networks to radically new realities Next Polski applies these fresh insights to three critical security issues how best to defend our national interests to take offensive action to protect our

interests and to strengthen our financial system Finally she provides rules for the road that can be applied to a world of problems how best to compete in global markets to build stronger more secure communities to manage energy and other key resources to invest in and secure critical infrastructure to address the structural impacts of trade and to manage tomorrow's catastrophes both natural and man made As a political economist executive government advisor and consultant Polski has spent more than two decades devising strategies for surviving change in the global political economy Now drawing on the breakthrough research in social neuroscience she offers insights that will help you thrive not just survive First kill all the pundits and policy wonks Why you'll make better decisions by thinking for yourself and how to do it Thinking in the wild Uncovering the intuitive interactions between our minds bodies and 21st century environment Overcoming our biases our histories and our vulnerability to groupthink Mastering the deep motivations that traditional economics doesn't understand
