# The Practical Gogitator

or The Thinker's Anthology

A new edition, enlarged, adding  
new insights to old wisdom.

SELECTED and ARRANGED  
by Charles P. Curtis, Jr.  
and Ferris Greenslet

"The job of rounding up . . . what is provocative and helpful,  
sublime and inspired . . . judging it and arranging it for  
practical use, is what the editors of The Practical Gogitator  
set out for themselves. Their success is amazing and  
heart-warming." — *Saturday Review of Literature*

Postpositivism and Educational Research D. C. Phillips, Nicholas C. Burbules, 2000-03-22 This volume presents in a forthright and lively way an account of the philosophical position generally identified as Postpositivistic that undergirds much of mainstream research in education and the related social sciences The discussion throughout is informed by recent developments in philosophy of science Authors D C Phillips and Nicholas C Burbules cite a number of interesting examples from the educational research and evaluation literature to illustrate the value of a scientific approach Many educational researchers aspire to carry out rigorous or disciplined inquiry aimed at producing accurate and generally truthful accounts of educational phenomena and the causal psychological or social processes that lay behind them However many recent critics have argued that it is a mistake to believe that research can yield theories or advance claims that are true objective and value neutral In other words that researchers always work within frameworks that embody important and often questionable assumptions about values and the nature of human knowledge This book argues that while there is much to be learned from recent critiques traditional scientific values and assumptions are not outmoded The authors show students how to implement

and benefit from the scientific method in ways that take into account recent critiques      **Harper's Magazine** Lee Foster
