Eisenstein, 2012-03-29 In 1979 Elizabeth Eisenstein provided the first full scale treatment of the fifteenth century printing revolution in the West in her monumental two volume work *The Printing Press as an Agent of Change* This abridged edition after summarising the initial changes introduced by the establishment of printing shops goes on to discuss how printing challenged traditional institutions and affected three major cultural movements the Renaissance the Reformation and the rise of modern science Also included is a later essay which aims to demonstrate that the cumulative processes created by printing are likely to persist despite the recent development of new communications technologies [The Printing Press as an Agent of Change](#) Elizabeth L. Eisenstein, 1980-09-30 Originally published in two volumes in 1980 *The Printing Press as an Agent of Change* is now issued in a paperback edition containing both volumes The work is a full scale historical treatment of the advent of printing and its importance as an agent of change Professor Eisenstein begins by examining the general implications of the shift from script to print and goes on to examine its part in three of the major movements of early modern times the Renaissance the Reformation and the rise of modern science **Ideology and Foreign Policy in Early Modern**

Europe (1650-1750) Gijs Rommelse, 2016-05-13 The years 1650 to 1750 sandwiched between an age of wars of religion and an age of revolutionary wars have often been characterized as a de ideologized period However the essays in this collection contend that this is a mistaken assumption For whilst international relations during this time may lack the obvious polarization between Catholic and Protestant visible in the proceeding hundred years or the highly charged contest between monarchies and republics of the late eighteenth century it is forcibly argued that ideology had a fundamental part to play in this crucial transformative stage of European history Many early modernists have paid little attention to international relations theory often taking a Realist approach that emphasizes the anarchism materialism and power political nature of international relations In contrast this volume provides alternative perspectives viewing international relations as socially constructed and influenced by ideas ideology and identities Building on such theoretical developments allows international relations after 1648 to be fundamentally reconsidered by putting political and economic ideology firmly back into the picture By engaging with and building upon recent theoretical developments this collection treads new terrain Not only does it integrate cultural history with high politics and foreign policy it also engages directly with themes discussed by political

scientists and international relations theorists As such it offers a fresh and genuinely interdisciplinary approach to this complex and fundamental period in Europe s development **Early Modern Europe, 1450-1789** Merry E.

James A. Dator,John A. Sweeney,Aubrey M. Yee,2014-09-09 Mutative Media is a sweeping examination of how communication technologies have contributed to changes in people s thoughts and actions and thus in the power structures of societies in the past at present and in four alternative futures We start by surveying what is generally known about the emergence of human language and speech that has enabled humans to extend their organizing abilities beyond that of other hominids We then review research on the emergence of signs symbols and eventually writing which led to new ways of

thinking acting and organizing in scribal societies and vastly extended human influence globally We consider the impact of the printing press in Europe the Middle East China and Korea that led to various ways of thinking and organizing in modern societies and conclude our historical survey with a discussion of the emergence and impact of electric and electronic communication technologies from the nineteenth century to the present After a brief overview of what futures studies is and is not based on our extensive experience in the field we present four generic alternative futures and discuss a prototype of a hybrid mixed reality game designed to enable players to experience the power and potential of new communication technologies within four very different environments and conditions We think you will be intrigued by our surprising findings and what they may mean for future generations

Body and Identity Angela Franks, 2025-08-15 Angela Franks provides a sweeping intellectual history of identity particularly in terms of how identity relates to the body with an emphasis on the importance of Christianity to this understanding Modern questions about our bodies and how we see ourselves are often complex and problematic To better answer these contemporary questions and navigate identity politics Angela Franks seeks to provide a better understanding of identity She begins by giving three basic meanings of the term identity through time the true or authentic self and our awareness of ourselves She engages with thinkers from antiquity to present day and investigates the decisive developments that Christianity provided Within Christianity came a new awareness of the distinctive individuality of each person the true self called by God in a way that often breaks away from the solid or fixed structures of identity formation such as family class and nation This more liquid idea of identity continues to evolve in modern times though without its theistic emphasis on God's call The result is a purely liquid self that consists of consciousness and activity but without a grounded self that is either the object or the subject of consciousness This is the empty self we have today one that is given much more to do and less to be A comprehensive history of identity Body and Identity brings the theological history of the self to the forefront in order to address the empty self and how identity is defined today

A Short History of the Renaissance in Northern Europe

Malcolm Vale,2020-04-02 The concept of a Northern European Renaissance in the arts in thought and in more general culture north of the Alps often evokes the idea of a cultural transplant which was not indigenous to or rooted in the society from which it emerged Classic definitions of the European Renaissance during the 14th 15th and 16th centuries have often seen it as an Italian import of for example humanism and classical learning into the Gothic North There were certainly differences between North and South which have to be addressed not least in the development of the visual arts In this book Malcolm Vale argues for a Northern Renaissance which while cognisant of Italian developments had a life of its own expressed through such innovations as a rediscovery of pictorial space and representational realism and which displayed strong continuities with the indigenous cultures of northern Europe But it also contributed new movements and tendencies in thought the visual arts literature religious beliefs and the dissemination of knowledge which often stemmed from and built upon those continuities A Short History of the Renaissance in Northern Europe while in no way ignoring or diminishing the importance of the Greek and Roman legacy seeks other sources and different uses of classical antiquity for a rather different kind of Renaissance in the North
