Roberts, 2024-05-14 A leading art historian presents a new grammar for understanding the meaning and significance of print In process and technique printmaking is an art of physical contact From woodcut and engraving to lithography and screenprinting every

print is the record of a contact event the transfer of an image between surfaces under pressure followed by release Contact reveals how the physical properties of print have their own poetics and politics and provides a new framework for understanding the intelligence and continuing relevance of printmaking today Focusing on the material and spatial transformations of the printmaking process rather than its reproducibility this beautifully illustrated book explores the connections between print painting and sculpture but also between the fine arts industrial arts decorative arts and domestic arts Throughout Roberts asks what artists are learning from print and what we in turn can learn from them Paper and Light Julian Brooks,Michelle Sullivan,2024-10-29 This volume looks at the techniques and materials that artists have utilized since the Renaissance to create spectacular light effects in drawings The treatment of light and shadow is one of the building blocks of drawing From techniques such as highlights and reserves to material selection and the creation of translucent tracing paper to the use of light as a medium for viewing artworks artists for hundreds of years have found innovative and dazzling ways to create light on a sheet of paper This publication examines the central relationship between paper and light in the world of drawings in western European art from the Renaissance to the twentieth century Focusing on drawings from the collection of the J Paul Getty Museum as well as works from the British Museum Mus e du Louvre and others and featuring masterful works by such artists as Parmigianino Leonardo da Vinci Nicolas Poussin Odilon Redon Edgar Degas and Georges Seurat Paper and Light will entice readers to look longer and more closely at drawings deriving an even deeper appreciation for the skill and labor that went into them This volume is published to accompany an exhibition on view at the J Paul Getty Museum at the Getty Center from October 15 2024 to January 19 2025 **Contemporary Voices** Ann Temkin,Museum of Modern Art (New York, N.Y.),2005 Catalog of an exhibition held Feb 4 Apt 25 2005 **Philippe de Montebello and the Metropolitan Museum of Art** James R. The Architecture of Error Francesca Hughes, 2014-11-07 Why the rise of redundant precision in architecture and the accompanying fear of error are key to understanding the discipline's needs, anxieties and desires When architects draw even brick walls to six decimal places with software designed to cut lenses it is clear that the logic that once organized relations between precision and material error in construction has unraveled Precision already a promiscuous term seems now to have been uncoupled from its contract with truthfulness Meanwhile error and the always political space of its dissent has reconfigured itself In *The Architecture of Error* Francesca Hughes argues that behind the architect's acute fetishization of redundant precision lies a special fear of physical error What if we were to consider the pivotal cultural and technological transformations of modernism to have been driven not so much by the causes its narratives declare she asks as by an unspoken horror of loss of control over error material life and everything that matter stands for Hughes traces the rising intolerance of material vagaries from the removal of ornament to digitalized fabrication that produced the blind rejection of organic materials the proliferation of material testing and the rhetorical obstacles that blighted cybernetics Why is it she asks that the more we cornered physical error the more we feared it Hughes's analysis of redundant precision exposes an architecture of fear whose politics must be called into question Proposing error as a new category for architectural thought Hughes draws on other disciplines and practices that have interrogated precision and failure citing the work of scientists Nancy Cartwright and Evelyn Fox Keller and visual artists Gordon Matta Clark Barbara Hepworth Rachel Whiteread and others These non architect practitioners she argues show that error need not be excluded and precision can be made accountable

American Printmakers of the Twentieth Century Donald E. Smith, 2004 [Analyzing Art and Aesthetics](#) Anne Collins Goodyear, Margaret A. Weitekamp, 2013-10-30 This ninth volume of the *Artefacts* series explores how artists have responded to developments in science and technology past and present Rather than limiting the discussion to art alone editors Anne Collins Goodyear and Margaret Weitekamp also asked contributors to consider aesthetics the scholarly consideration of sensory responses to cultural objects When considered as aesthetic objects how do scientific instruments or technological innovations reflect and embody culturally grounded assessments about appearance feel and use And when these objects become museum artifacts what aesthetic factors affect their exhibition Contributors found answers in the material objects themselves This volume reconsiders how science technology art and aesthetics impact one another [Tal Stern](#)[gast. Twelve Paintings](#) Michael Eissenhauer, Tal Stern, 2020-12-04 Berlin's Gemäldegalerie is known for its outstanding collection of European paintings from the thirteenth to eighteenth century Each chapter in this book is dedicated to one painting from the collection In the breadth of this idiosyncratic selection painting as it discovers itself becomes a medium for the formulation of modern subjectivity Each painting in focus unfolds its own making and its artistic concerns as

they reflect contemporary issues today What are the paradoxes within which art is made by women How does the primordial drive to destroy works of art affect today's art discourse Where did the modern struggle of painting against the picture begin Why does the Wild Man from early German Renaissance still haunt us And why doesn't it matter whether Jan Vermeer used an optical device for his paintings Twelve Paintings highlights the currentness of the Old Masters
