The Grand Canyon Early Impressions:

The Grand Canyon, Early Impressions Paul Schullery, 1981 *First Impressions* David J. Weber, William DeBuys, 2017-08-22 This unique guide for literate travelers in the American Southwest tells the story of fifteen iconic sites across Arizona New Mexico southern Utah and southern Colorado through the eyes of the explorers missionaries and travelers who were the first non natives to describe them Noted borderlands historians David J Weber and William deBuys lead readers through centuries of political cultural and ecological change The sites visited in this volume range from popular destinations within the National Park System including Carlsbad Caverns the Grand Canyon and Mesa Verde to the Spanish colonial towns of Santa Fe and Taos and the living Indian communities of Acoma Zuni and Taos Lovers of the Southwest residents and visitors alike will delight in the authors skillful evocation of the region s sweeping landscapes its rich Hispanic and Indian heritage and the sense of discovery that so enchanted its early explorers Culture, Technology, and the Creation of America's National Parks Richard A. Grusin, 2004-04-22 Richard Grusin s innovative study investigates how the establishment of national parks participated in the production of American national identity after the Civil War The creation of America s national parks is usually seen as an uncomplicated act of environmental preservation Grusin argues instead that parks must be understood as complex cultural technologies for the reproduction of nature as landscape art He explores the origins of America s three major parks Yosemite Yellowstone and Grand Canyon in relation to other forms of landscape representation including photography mapping travel writing and fiction Pilgrimage to the National Parks Lynn Ross-Bryant, 2013 National Parks America s Best Idea were from the first seen as sacred sites embodying the God given specialness of American people and American land and from the first they were also marked as tourist attractions The inherent tensions between these two realities ensured the parks would be stages where the country s conflicting values would be performed and contested As pilgrimage sites embody the values and beliefs of those who are drawn to them so Americans could travel to these sacred places to honor experience and be restored by the powers that had created the American land and the American enterprise This book explores the importance of the discourse of nature in American culture arguing that the attributes and symbolic power that had first been associated with the new world and then the frontier were embodied in the National Parks Author Ross Bryant focuses on National Parks as pilgrimage sites around which a discourse of nature developed and argues the centrality of religion in understanding the dynamics of both the language and the ritual manifestations related to National Parks Beyond the specific contribution to a richer analysis of the National Parks and their role in understanding nature and religion in the U S this volume contributes to the emerging field of religion and the environment larger issues in the study of religion e g cultural events and the spatial element in meaning making and the study of non institutional religion *Moon Arizona & the Grand Canyon* Tim Hull, 2018-06-12 Explore Arizona s vast open spaces dreamy canyons and colorful culture with Moon Arizona the Grand Canyon Inside you ll find Strategic flexible

Landscapes David E. Nye, 2021-04-27 How conflicting ideas of nature threaten to fracture America's identity Amber waves of grain purple mountain majesties American invest much of their national identity in sites of natural beauty And yet American lands today are torn by conflicts over science religion identity and politics Creationists believe that the Biblical flood carved landscapes less than 10 000 years ago environmentalists protest pipelines Western states argue that the federal government's land policies throttle free enterprise Native Americans demand protection for sacred sites In this book David Nye looks at Americans irreconcilably conflicting ideas about nature A landscape is conflicted when different groups have different uses for the same location for example when some want to open mining sites that others want to preserve or when suburban development impinges on agriculture Some landscapes are so degraded from careless use that they become toxic anti landscapes Nye traces these conflicts to clashing conceptions of nature ranging from pastoral to Native American to military industrial that cannot be averaged into a compromise Nye argues that today's environmental crisis is rooted in these conflicting ideas about land Depending on your politics global warming is either an inconvenient truth or fake news America's contradictory conceptions of nature are at the heart of a broken national consensus **It Happened at Grand Canyon**
