Matthew Lauzon, 2011-03-15 In *Signs of Light* Matthew Lauzon traces the development of very different French and British ideas about language over the course of the late seventeenth and eighteenth centuries and demonstrates how important these ideas were to emerging notions of national character Drawing examples from a variety of French and English language works in a wide range of areas including language theory philosophy rhetoric psychology missionary tracts and literary texts Lauzon explores how French and British thinkers of the day developed arguments that certain kinds of languages are superior to others The nature of animal language and British and French understandings of the languages of North American Indians were vigorously debated Theories of animal language juxtaposed the apparent virtues of transparency and wit considerations of savage language resulted in eloquence being regarded as an even higher accomplishment Eventually the French language came to be prized for its wit and sociability and English for its simple clarity and vigor Lauzon shows that besides concerns about establishing the clarity of introspective representations questions about the energetic communication of sincere emotion and about the sociable communication of wit were crucial to language theories during this period A richly interdisciplinary work *Signs of Light* is a compelling account of a formative period in language theory *German*

Modernism Walter Frisch, 2005-07-25 In this pioneering erudite study of a pivotal era in the arts Walter Frisch examines music and its relationship to early modernism in the Austro German sphere Seeking to explore the period on its own terms Frisch questions the common assumption that works created from the later 1870s through World War I were transitional between late romanticism and high modernism Drawing on a wide range of examples across different media he establishes a cultural and intellectual context for late Richard Wagner Richard Strauss Gustav Mahler and Arnold Schoenberg as well as their less familiar contemporaries Eugen d Albert Hans Pfitzner Max Reger Max von Schillings and Franz Schreker Frisch explores ambivalent modernism in the last quarter of the nineteenth century as reflected in the attitudes of and relationship between Nietzsche and Wagner He goes on to examine how naturalism the first self conscious movement of German modernism intersected with musical values and practices of the day He proposes convergences between music and the visual arts in the works of Brahms Max Klinger Schoenberg and Kandinsky Frisch also explains how near the turn of the century composers drew inspiration and techniques from music of the past the Renaissance Bach Mozart and Wagner Finally he demonstrates how irony became a key strategy in the novels and novellas of Thomas Mann the symphonies of Mahler and the operas of Strauss and Hofmannsthal **Naukratis** Astrid Moller, 2000-12-22 Archaic Naukratis was a busy trading place in the Western Delta of the Nile renowned for its sanctuaries and courtesans granting the Greeks access to Egyptian grain and luxury items Now more than one hundred years after the discovery and excavation of Naukratis the author offers the first full length analysis of the archaeology and archaic history of this important site Although Naukratis always features in modern accounts of ancient Greek colonization it was not a place where the Greeks could freely establish their own political and social organization it was under the strict control of the Egyptian pharaoh and his officials To understand the special status

of Naukratis the author takes the port of trade model surveying the political social and economic background of both Late Period Egypt and archaic Greece A major section of the book comprises an archaeological re evaluation of the topography of archaic Naukratis and its material finds The sanctuaries archaic pottery styles terracottas faiences statuettes and other small finds are examined in the light of recent scholarship and an in depth study of the literary evidence is brought to bear on the archaeological material This book comprises a significant contribution to our understanding of Graeco Egyptian relations during the seventh and sixth centuries BC and also demonstrates that Polanyian economic theory can play an invaluable role in the ongoing debate about the concepts best employed to analyse the ancient Greek economy How John Works Douglas Estes, Ruth Sheridan, 2016-10-07 Essential classroom resource for New Testament courses In this book a group of international scholars go in detail to explain how the author of the Gospel of John uses a variety of narrative strategies to best tell his story More than a commentary this book offers a glimpse at the way an ancient author created and used narrative features such as genre character style persuasion and even time and space to shape a dramatic story of the life of Jesus Features An introduction to the Fourth Gospel through its narrative features and dynamics Fifteen features of story design that comprise the Gospel of John Short targeted essays about how John works that can be used as starting points for the study of other Gospels texts
