The Advanced Course on Artificial Intelligence ACAI 2001 with the subtitle Multi Agent Systems and Their Applications held in Prague Czech Republic was a joint event of ECCAI the European Coordinating Committee for Artificial Intelligence and AgentLink the European Network of Excellence for Agent Based Computing Whereas ECCAI organizes two week ACAI courses on different topics every second year AgentLink's European Agent Systems Summer School EASSS has been an annual event since 1999 This year both of these important events were merged together giving weight to the fact that multi agent systems currently represent one of the hottest topics in AI research The name ACAI 2001 Summer School is intended to emphasize that this event continues the tradition of regular ECCAI activities ACAI as well as the EASSS summer schools of AgentLink The Prague ACAI Summer School was proposed and initiated by both the Gerstner Laboratory Czech Technical University Prague GL CTU and the Czech Society for Cybernetics and Informatics CSKI with the support of the Austrian Research Institute for Artificial Intelligence in Vienna OFAI Part of our motivation was catalyzed by experience gained in 1992 during the International Summer School Advanced Topics in Artificial Intelligence see Springer's LNAI vol 617 which was organized by the same Czech and Austrian bodies One of the most important stimulating factors behind the organization of ACAI 2001 was the support provided by the European Commission to the Gerstner Laboratory within the frame of the MIRACLE Center of Excellence project IST No

Intelligent Software Agents Walter Brenner, Rüdiger Zarnekow, Hartmut Wittig, 2012-12-06

2 chapter contains examples of intelligent agents arranged according to their application areas Chapter 7 closes with a prospective view of the future development of intelligent agents Everyone concerned with the Internet and the new possibilities of information and communication technology knows that nowadays there is no area that is developing faster The authors are aware of the dynamics of this research area and its effects when they describe such a fast developing area in a slow traditional medium like a book One thing is sure today when the book appears on the market new intelligent agents will already exist and some of the hypotheses made by this book will have been shown to be incorrect Why despite this does it make sense to write a classical book on this subject Is there an alternative Experience shows that the majority of the people in business and public life who make decisions on the use of new technologies continue to prefer books and articles in periodicals rather than electronic sources such as the Internet Or is there some other reason for the enormous success of Nicolas Negroponte's book Being Digital which we thank for multimedia and many concepts of the digital and networked world and even intelligent agents Today a book is still the only way to establish a new area
