The Great Challenge Nationalities And The Bolshevik State 1917 1930:

The Great Challenge Hélène Carrère d'Encausse, 1992 In this enlightening and provocative book a distinguished writer on international affairs traces the failure of Soviet nationalities policy to the formative years of the Bolshevik regime when that policy was formulated and implemented The author explores the unfolding of the national question from pre revolutionary period through 1930 bringing to light the broad array of national issues and nationality groups that made history in the old Soviet satellites around the Baltic

The Prospects for Liberal Nationalism in Post-Leninist States

Cheng Chen, 2010-11-01 **Empire of Nations** Francine Hirsch, 2014-11-15 When the Bolsheviks seized power in 1917 they set themselves the task of building socialism in the vast landscape of the former Russian Empire a territory populated by hundreds of different peoples belonging to a multitude of linguistic religious and ethnic groups Before 1917 the Bolsheviks had called for the national self determination of all peoples and had condemned all forms of colonization as exploitative After attaining power however they began to express concern that it would not be possible for Soviet Russia to survive without the cotton of Turkestan and the oil of the Caucasus In an effort to reconcile their anti imperialist position with their desire to hold on to as much territory as possible the Bolsheviks integrated the national idea into the administrative territorial structure of the new Soviet state In *Empire of Nations* Francine Hirsch examines the ways in which former imperial ethnographers and local elites provided the Bolsheviks with ethnographic knowledge that shaped the very formation of the new Soviet Union The ethnographers who drew inspiration from the Western European colonial context produced all union censuses assisted government commissions charged with delimiting the USSR's internal borders led expeditions to study the human being as a productive force and created ethnographic exhibits about the Peoples of the USSR In the 1930s they would lead the Soviet campaign against Nazi race theories Hirsch illuminates the pervasive tension between the colonial economic and ethnographic definitions of Soviet territory this tension informed Soviet social economic and administrative structures A major contribution to the history of Russia and the Soviet Union *Empire of Nations* also offers new insights into the connection between ethnography and empire

The dissolution of the Soviet Union has provided scholars with tremendously rich material for the study of comparative nation building Not since the decolonization of Africa in the 1960s have so many new states been established in one stroke in one region The post Soviet states moreover have all the necessary prerequisites for fruitful comparison a number of similarities but also significant differences in terms of size culture and recent history In order to survive in the long run modern states normally must have a population that possesses some sense of unity Its citizens must adhere to some common values and common allegiance towards the same state institutions and symbols This does not mean that all inhabitants must necessarily share the same culture but they should at least regard themselves as members of the same nation Strategies to foster this kind of common nationhood in a population are usually referred to as nation building After a decade of post Soviet nation building

certain patterns are emerging and not always the most obvious ones Some states seem to manage well against high odds while others appear to be disintegrating or sinking slowly into oblivion To a remarkable degree the former Soviet republics have chosen different models for their nation building This book examines the preconditions for these endeavors the goals the state leaders are aiming at and the means they employ to reach them **Beyond Soviet Studies** Daniel

Orlovsky,1995-02 Daniel Orlovsky brings together a group of leading scholars attempt a systematic assessment of the state of studies of the former Soviet Union after its collapse The authors re examine the transition from communism and review the study of post Soviet society national identity and nationalism politics and political institutions economics foreign policy and culture They offer constructive criticisms of the field and set out research questions for an uncertain future Constructing

Ethnopolitics in the Soviet Union D. Zisserman-Brodsky,2003-07-03 The nationality question was long central to Soviet thought and policy and the failure to provide a convincing answer played a major role in the break up of the Soviet Union into ethnically or nationally defined states Zisserman Brodsky explores various explanations of nationalism and its resurgence through a close and unprecedented examination of dissident writings of diverse ethnic groups in the former Soviet Union thereby bridging macro theory with micro politics Dissident ethnic networks were a crucial independent institution in the Soviet Union and a basis of civil society Voicing the discontent and resentment of the periphery at the policies of the centre or metropole the dissident writings known as samizdat highlighted anger at deprivations imposed in the political cultural social and economic spheres Ethnic dissident writings drew on values both internal to the Soviet system and international as sources of legitimation they met a divided reaction among Russians with some privileging the unity of the Soviet Union and others sympathetic to the rhetoric of national rights This focus on national rather than individual rights helps explain developments since the fall of the Soviet Union including the prevalence of authoritarian governments in newly independent states of the former Soviet Union *Soviet Nation-Building in Central Asia* Grigol Ubiria,2015-09-16 The demise of the

Soviet Union in 1991 resulted in new state led nation building projects in Central Asia The emergence of independent republics spawned a renewed Western scholarly interest in the region s nationality issues Presenting a detailed study this book examines the state led nation building projects in the Soviet republics of Kazakhstan and Uzbekistan Exploring the degree forms and ways of the Soviet state involvement in creating Kazakh and Uzbek nations this book places the discussion within the theoretical literature on nationalism The author argues that both Kazakh and Uzbek nations are artificial constructs of Moscow based Soviet policy makers of the 1920s and 1930s This book challenges existing arguments in current scholarship by bringing some new and alternative insights into the role of indigenous Central Asian and Soviet officials in these nation building projects It goes on to critically examine post Soviet official Kazakh and Uzbek historiographies according to which Kazakh and Uzbek peoples had developed national collective identities and loyalties long before the Soviet era This book will be a useful contribution to Central Asian History and Politics as well as studies of Nationalism and

Soviet Politics **Empire and Belonging in the Eurasian Borderlands** Krista A. Goff, Lewis H. Siegelbaum, 2019-04-15

Empire and Belonging in the Eurasian Borderlands engages with the evolving historiography around the concept of belonging in the Russian and Ottoman empires. The contributors to this book argue that the popular notion that empires do not care about belonging is simplistic and wrong. Chapters address numerous and varied dimensions of belonging in multiethnic territories of the Ottoman Empire, Imperial Russia, and the Soviet Union from the mid nineteenth to the late twentieth centuries. They illustrate both the mutability and the durability of imperial belonging in Eurasian borderlands. Contributors to this volume pay attention to state authorities but also to the voices and experiences of teachers, linguists, humanitarian officials, refugees, deportees, soldiers, nomads, and those left behind. Through those voices, the authors interrogate the mutual shaping of empire and nation, noting the persistence and frequency of coercive measures that imposed belonging or denied it to specific populations deemed inconvenient or incapable of fitting in. The collective conclusion that editors Krista A. Goff and Lewis H. Siegelbaum provide is that nations must take ownership of their behaviors, irrespective of whether they emerged from disintegrating empires or enjoyed autonomy and power within them. Life Has Become More Joyous, Comrades Karen Petrone, 2000-11-22

Life Has Become More Joyous, Comrades: Celebrations in the Time of Stalin. Karen Petrone. A lively investigation of the official and unofficial meanings of Stalinist celebrations. An impressive and highly readable book that casts a clear and disturbing light on the relationship of Stalinist mythology, state power, popular participation, and the unending complexities of social and cultural survival mechanisms and daily life. Richard Stites. In the Soviet Union in the 1930s, public celebrations flourished while Stalinist repression intensified. What explains this coincidence of terror and celebration? Using popular media and drawing extensively on documents from previously inaccessible Soviet archives, Karen Petrone demonstrates that to dismiss Soviet celebrations as mere diversion is to lose a valuable opportunity for understanding how the Soviet system operated. As the state attempted to mobilize citizens to participate in the project to create New Soviet men and women, celebration culture became more than a means to distract a population suffering from poverty and deprivation. The planning and execution of celebrations reflected the Soviet intelligentsia's efforts to bring social and cultural enlightenment to the people. Physical culture demonstrations, celebrations of Arctic and aviation exploits, the Pushkin Centennial of 1937, and the 20th Anniversary of the October Revolution and the celebration of New Year's Day were opportunities for the Soviet leadership to fuse traditional prerevolutionary values and practices with socialist ideology in an effort to educate its citizens and build support for the state and its policies. However, official celebrations were often appropriated by citizens for purposes that were unanticipated and unsanctioned by the state. Through celebrations, Soviet citizens created hybrid identities and defined their places in the emerging Stalinist hierarchy, allowing them to uphold the Soviet order while arrests and executions were rampant. This rich look at celebrations reveals the complex dialogues and negotiations between citizens and leaders in the endeavor to create Soviet culture. Karen Petrone is Assistant Professor of
