The Great Lakes Forest Susan Flader, 1983-01-01 **The Great Lakes Forest** Susan Flader, Forest History Society, 1983 [A Companion to Global Environmental History](#) J. R. McNeill, Erin Stewart Mauldin, 2015-05-04 The Companion to Global Environmental History offers multiple points of entry into the history and historiography of this dynamic and fast growing field to provide an essential road map to past developments current controversies and future developments for specialists and newcomers alike Combines temporal geographic thematic and contextual approaches from prehistory to the present day Explores environmental thought and action around the world to give readers a cultural intellectual and political context for engagement with the environment in modern times Brings together environmental historians from around the world including scholars from South Africa Brazil Germany and China **Fishing the Great Lakes** Margaret Beattie Bogue, 2001-06-28 Fishing the Great Lakes is a sweeping history of the destruction of the once abundant fisheries of the great inland seas that lie between the United States and Canada Though lake trout whitefish freshwater herring and sturgeon were still teeming as late as 1850 Margaret Bogue documents here how overfishing pollution political squabbling poor public policies and commercial exploitation combined to damage the fish populations even before the voracious sea lamprey invaded the lakes and decimated the lake trout population in the 1940s From the earliest records of fishing by native peoples through the era of European exploration and settlement to the growth and collapse of the commercial fishing industry Fishing the Great Lakes traces the changing relationships between the fish resources and the people of the Great Lakes region Bogue focuses in particular on the period from 1783 when Great Britain and the United States first politically severed the geographic unity of the Great Lakes through 1933 when the commercial fishing industry had passed from its heyday in the late nineteenth century into very serious decline She shows how fishermen entrepreneurial fish dealers the monopolistic A Booth and Company which distributed and marketed much of the Great Lakes catch and policy makers at all levels of government played their parts in the debacle So too did underfunded scientists and early conservationists unable to spark the interest of an indifferent public Concern with the quality of lake habitat and the abundance of fish increasingly took a backseat to the interests of agriculture lumbering mining commerce manufacturing and urban development in the Great Lakes region Offering more than a regional history Bogue also places the problems of Great Lakes fishing in the context of past and current worldwide fishery concerns **Between Loving and Leaving** Jon K. Bonnicksen, 2000-02-07 At the time of European discovery the ancient North American forests stretched across nearly half the continent And while today little remains of this past glory efforts are underway to bring back some of the diverse ecosystems of that era America's Ancient Forests From the Ice Age to the Age of Discovery provide scientists and

professionals with essential information for forest restoration and conservation projects while presenting a compelling and far reaching account of how the North American landscape has evolved over the past 18 000 years The book weaves historical accounts and scientific knowledge into a dynamic narrative about the ancient forests and the events that shaped them Divided into two major parts it covers first the glaciers and forests of the Ice Age and the influences of native peoples and then provides an in depth look at these majestic forests through the eyes of the first European explorers Changes in climate and elevation the movement of trees northward the assembly of modern forests and qualities that all ancient forests shared are also thoroughly examined A special feature of this book is its self contained introduction to the early history of Native American peoples and their environment The author draws on his roots in the Osage nation as well as painstaking research through the historical record offering a complete discussion of how the cultural practices of hunting agriculture and fire helped form the ancient forests

Karamanski examines the interplay between men and technology in the lumbering of Michigan's rugged Upper Peninsula Three distinct periods emerged as the industry evolved The pine era was a rough pioneering time when trees were felled by axe and floated to ports where logs were loaded on schooners for shipment to large cities When the bulk of the pine forests had been cut other entrepreneurs saw opportunity in the unexploited stands of maple and birch and harnessed the railroad to transport logs Finally in the pulpwood era weed trees despised by previous loggers are cut by chain saw and moved by skidder and truck Narrating the history of Michigan's forest industry Karamanski provides a dynamic study of an important part of the Upper Peninsula's economy
