Clive D. L. Wynne,2013-10-31 Does your dog know when you've had a bad day Can your cat tell that the coffee pot you left on might start a fire Could a chimpanzee be trained to program

your computer In this provocative book noted animal expert Clive Wynne debunks some commonly held notions about our furry friends It may be romantic to ascribe human qualities to critters he argues but it s not very realistic While animals are by no means dumb they don t think the same way we do Contrary to what many popular television shows would have us believe animals have neither the theory of mind capabilities that humans have that is they are not conscious of what others are thinking nor the capacity for higher level reasoning So in Wynne s view when Fido greets your arrival by nudging your leg he s more apt to be asking for dinner than commiserating with your job stress That s not to say that animals don t possess remarkable abilities and *Do Animals Think* explores countless examples there s the honeybee which not only remembers where it found food but communicates this information to its hivemates through an elaborate dance And how about the sonar guided bat which locates flying insects in the dark of night and devours lunch on the wing Engagingly written *Do Animals Think* takes aim at the work of such renowned animal rights advocates as Peter Singer and Jane Goodall for falsely humanizing animals Far from impoverishing our view of the animal kingdom however it underscores how the world is richer for having such a diversity of minds be they of the animal or human variety
