The Population Dynamics Of The Mucajai Yanomama:

The Population Dynamics of the Mucajai Yanomama John Early, 2014-06-06 The Population Dynamics of the Mucajai Yanomama is an analysis of the Mucajai Yanomama an Indian foraging horticultural group located in northern Brazil The text is an investigation of the population dynamics of the Yanomama Indians using methods of quantitative demography and qualitative ethnography The timeline of text focuses from 1958 to 1987 from their first ever contact with representative of the outer world The book is divided into four major parts and comprised of a total of 10 chapters Part One introduces the tribe of the Mucajai Yanomama and discusses their population dynamics as well as provides an overview of postcontact period of 28 years Part Two focuses on the demographic issues of the tribe This part looks into variables such as fertility mortality and migration to understand factors such as cultural antecedents and age sex structure Part Three serves as a synthesis of the demographic variables and their relation to each other The other issue synthesized in this part of the book is the impact of population structure to the cultural practices of the tribe Lastly Part Four provides the conclusion of the study and compares the results to other studies of Yanomama groups The text is a helpful resource mostly to anthropologists and evolutionary demographers but can also be a reference to anyone who studies population dynamics *Yanomami* Rob

Borofsky, Bruce Albert, 2005-01-31 *Yanomami* raises questions central to the field of anthropology questions concerning the practice of fieldwork the production of knowledge and anthropology s intellectual and ethical vision of itself Using the Yanomami controversy one of anthropology s most famous and explosive imbroglios as its starting point this books considers how fieldwork is done how professional credibility and integrity are maintained and how the discipline might change to address central theoretical and methodological problems Both the most up to date and thorough public discussion of the Yanomami controve *Darkness in El Dorado* Patrick Tierney, 2001 What Guns Germs and Steel did for colonial history this book will do for modern anthropology telling the explosive story of how ruthless journalists self serving anthropologists and obsessed scientists placed the Yanomami one of the Amazon basin s oldest tribes on the cusp of extinction A New York Times Notable Book of photos

The Indians of Central and South America James S. Olson, 1991-06-17 At a juncture in history when much interest and attention is focused on Central and South American political ecological social and environmental concerns this dictionary fills a major gap in reference materials relating to Amerindian tribes This one volume reference collects important information about the current status of the indigenous peoples of Central and South America and offers a chronology of the conquest of the Amerindian tribes a list of tribes by country and an extensive bibliography of surviving American Indian groups Historical as well as contemporary descriptions of approximately 500 existing tribes or groups of people are provided along with several bibliographic citations at the conclusion of each entry The focus of the volume is on those Indian groups that still maintain a sense of tribal identity For the vast majority of his entries James S Olson draws material from the Smithsonian Institution s seven volume Handbook of South American Indians as well as other classic

resources of a broad general nature Much attention is also focused on the complicated question of South American languages and on the definition of what constitutes an Indian Olson s introduction cites dozens of valuable reference works relating to these topics Following the introduction this survey of surviving Amerindians is divided into sections that contain entries for each existing tribe or group an appendix listing tribes by country the Amerindian conquest chronology and a bibliographical essay This unique reference work should be an important item for most public college and university libraries It will be welcomed by reference librarians historians anthropologists and their students

Evolutionary Perspectives on Infancy

Sybil L. Hart,David F. Bjorklund,2022-01-01 This unique volume is one of the first of its kind to examine infancy through an evolutionary lens identifying infancy as a discrete stage during which particular types of adaptations arose as a consequence of certain environmental pressures Infancy is a crucial time period in psychological development and evolutionary psychologists are increasingly recognizing that natural selection has operated on all stages of development not just adulthood The volume addresses this crucial change in perspective by highlighting research across diverse disciplines including developmental psychology evolutionary developmental psychology anthropology sociology nutrition and primatology Chapters are grouped into four sections Theoretical Underpinnings Brain and Cognitive Development Social Emotional Development Life and Death Evolutionary Perspectives on Infancy sheds new light on our understanding of the human brain and the environments responsible for shaping the brain during early stages of development This book will be of interest to evolutionary psychologists and developmental psychologists biologists and anthropologists as well as scholars more broadly interested in infancy

Life Histories of the Dobe !Kung Nancy Howell,2010 A clearly presented and terrifically detailed work from the perspective of human evolutionary life histories Dr Howell has written a text that manages to raise as many intriguing questions as it provides to answer Eric A Roth author of Culture Biology and Anthropological Demography Nancy Howell s book on the Demography of the Dobe Kung became an anthropological classic the first in depth analysis of the population structures and life histories of a foraging society Three decades later Howell returns to her initial data set to ask new questions inspired by Life History Theory In the process she examines how variations in group composition impact the well being of Kung children revealing that sharing is not just with one s closest relatives Sarah Blaffer Hrdy author of Mothers and Others The Evolutionary Origins of Mutual Understanding This is a unique scholarly book that reads like a detective novel Howell uses demographic anthropometric and foraging data on the Kung hunter gatherers of Southern Africa to investigate what explains variation in the nutritional well being of their children Each chapter builds on the previous one and through a process of elimination brings us closer to the answers which are often surprising Along the way we see how food sharing is necessary to explain the peculiar elements of human life history Frank Marlowe author of The Hadza Hunter Gatherers of Tanzania

Population Politics Virginia Abernethy, Garrett Hardin, 2018-05-11 International efforts to regulate fertility rates so that populations do not grow beyond the earth s capacity have included technical assistance and capital improved health care conditions to lower the risk of infant mortality increased opportunities to develop literacy the democratization of governments and several decades of liberal immigration and refugee policies favoring third world nations The persistence of high fertility despite international efforts confounds demographers Population Politics brilliantly dissects the paradigm responsible for the counterproductive efforts of nations and international agencies Abernethy a renowned anthropologist shows why policies hamper the shift to lower fertility Ireland Indonesia Cuba China Turkey and Egypt are but a few of the countries Abernethy examines showing how economic sociocultural and agricultural factors that have caused population growth can be harnessed to stabilize population size Population Politics is a provocative examination of the influence of aid and liberal immigration policies on world population growth and often counterproductive to the role of the United States as an industrial power This volume s uniquely interdisciplinary perspective will enlighten the lay reader as well as demographers and epidemiologists conservationists reproduction and family specialists agricultural economists and public health personnel Virginia D Abernethy is professor emeritus of psychiatry anthropology at Vanderbilt Medical School and was for 11 years the editor of the scholarly journal Population and Environment Garrett Hardin is emeritus professor of human ecology in the Department of Biological Sciences and the University of California Santa Barbara

Scoping the Amazon Stephen Nugent, 2016-07 Savage cannibal or utopian proto environmentalist Nugent examines both popular images of Amazon peoples in film and

general books as well as changing anthropological views of the rainforest and its people The Vanishing American Dream Virginia Deane Abernethy, 2017-09-08 The United States has gone off track allowing domestic and foreign aid policies to be co-opted by a government abetted by mass media that serves special interests rather than the greater national good Americans' tendencies to trust play fair and help have been abused and require replacement by a realistic outlook The Vanishing American Dream posits solutions to get America back on the right track Abernethy sees population growth driven by mass immigration as a major cause of economic and cultural changes that have been detrimental to most Americans The environment has been degraded by over crowding and increasing demands on natural resources Work is cheapened by explosive growth in the labour force creating a buyer's market One salary or wage no longer supports a family and educates children Women working outside the home is a necessity not a choice for most American families Furthermore feminism aimed originally at balanced gender roles has been turned viciously against males of all ages and ultimately against females through degrading their traditional and valuable contributions Abernethy proposes that Americans need time to regroup untroubled by a continuing influx of foreign peoples The family small business and responsive local government are centres around which a solvent and confident citizenry can prosper again **The Arc of Life** Grazyna Jasienska, Diana S. Sherry, Donna J. Holmes, 2017-01-03 Given the rapidly developing area of evolutionary medicine and public health The Arc of Life examines ways in which research conducted by biological anthropologists can enrich our understanding of variation in human health outcomes The book aims not only to showcase the perspective that biological anthropologists bring to the burgeoning field of evolutionary medicine but to underscore the context of human life history especially the concept of evolutionary trade offs and the ensuing biological processes that can affect health status over the life course This dual emphasis on life history theory and life cycle biology will make for a valuable and unique yet complementary addition to books already available on the subject of evolution and health The book consolidates diverse lines of research within the field of biological anthropology stimulates new directions for future research and facilitates communication between subdisciplines of human biology operating at the forefront of evolutionary medicine **Human Evolutionary Biology** Michael P. Muehlenbein, 2010-07-29 Wide ranging and inclusive this text provides an invaluable review of an expansive selection of topics in human evolution variation and adaptability for professionals and students in biological anthropology evolutionary biology medical sciences and psychology The chapters are organized around four broad themes with sections devoted to phenotypic and genetic variation within and between human populations reproductive physiology and behavior growth and development and human health from evolutionary and ecological perspectives An introductory section provides readers with the historical theoretical and methodological foundations needed to understand the more complex ideas presented later Two hundred discussion questions provide starting points for class debate and assignments to test student understanding **Advances in Historical Ecology** William L. Balée, 2012-09-18 Ecology is an attempt to understand the

reciprocal relationship between living and nonliving elements of the earth For years however the discipline either neglected the human element entirely or presumed its effect on natural ecosystems to be invariably negative Among social scientists notably in geography and anthropology efforts to address this human environment interaction have been criticized as deterministic and mechanistic Bridging the divide between social and natural sciences the contributors to this book use a more holistic perspective to explore the relationships between humans and their environment Exploring short and long term local and global change eighteen specialists in anthropology geography history ethnobiology and related disciplines present new perspectives on historical ecology A broad theoretical background on the material factors central to the field is presented such as anthropogenic fire soils and pathogens A series of regional applications of this knowledge base investigates landscape transformations over time in South America the Mississippi Delta the Great Basin Thailand and India The contributors focus on traditional societies where lands are most at risk from the incursions of complex state level societies This book lays the groundwork for a more meaningful understanding of humankind s interaction with its biosphere Scholars and environmental policymakers alike will appreciate this new critical vocabulary for grasping biocultural phenomena

The Origins of Native Americans Michael H. Crawford, 2001-02-26 A fascinating account of the genetic archaeological and demographic evidence for the peopling of the New World

Human Biology Sara Stinson, Barry Bogin, Dennis H. O'Rourke, 2012-04-10 This comprehensive introduction to the field of human biology covers all the major areas of the field genetic variation variation related to climate infectious and non infectious diseases aging growth nutrition and demography Written by four expert authors working in close collaboration this second edition has been thoroughly updated to provide undergraduate and graduate students with two new chapters one on race and culture and their ties to human biology and the other a concluding summary chapter highlighting the integration and intersection of the topics covered in the book

Abortion in the Age of Unreason Warren M. Hern, 2024-09-30 This vivid account by a nationally prominent doctor reports the daily challenges of offering and receiving abortion services in a volatile political and social atmosphere In stories from the front lines from protecting patients and staff from protesters attacks to the dangers to women of restricted access to abortion services and the pertinent findings of his remote research in Latin America Hern s book is strikingly detailed just as it exposes the needs of women and the U S national interest Dr Hern an abortion specialist researcher scholar and highly visible public advocate shows how abortion saves women s lives given the many risks that arise during pregnancy remarkably more than most people realize He points to political and national solutions to reverse a reawakened crisis that now threatens democracy Throughout the book Dr Hern shows how the current emergency was largely created by political actors who have exploited and distorted the abortion issue to increase and consolidate their power A vital component of women s health care the crisis over abortion is not new Yet the reversal of *Roe v Wade* and the steady accumulation of power by America s right wing has put the issue at a level of urgency and national prominence not

seen since the days before legalization Women's need for safe abortion services will continue as the struggle to secure their rights intensifies This book is about that struggle during what has evolved over the last 50 years to an Age of Unreason

Amazonian Indians from Prehistory to the Present Anna Roosevelt, 2022-05-10 Amazonia has long been a focus of debate about the impact of the tropical rain forest environment on indigenous cultural development This edited volume draws on the subdisciplines of anthropology to present an integrated perspective of Amazonian studies The contributors address transformations of native societies as a result of their interaction with Western civilization from initial contact to the present day demonstrating that the pre and postcontact characteristics of these societies display differences that until now have been little recognized

Lost Paradises and the Ethics of Research and Publication Institute of Biosciences Federal University of Rio Grande do Sul Francisco M. Salzano Department of Genetics, Department of Anthropology University of New Mexico A. Magdalena Hurtado Associate Professor, 2003-11-20 In 2000 the world of anthropology was rocked by a high profile debate over the fieldwork performed by two prominent anthropologists Napoleon Chagnon and James V Neel among the Yanomamo tribe of South America The controversy was fueled by the publication of Patrick Tierney's incendiary *Darkness in El Dorado* which accused Chagnon of not only misinterpreting but actually inciting some of the violence he perceived among these fierce people Tierney also pointed the finger at Neel as the unwitting agent of a deadly measles outbreak Attracting a firestorm of attention Tierney's book went straight to the heart of anthropology's most pressing

questions What are the right ways to study a tribal people How can scientists avoid unduly influencing those among whom they live What guidelines should govern the interactions economic social medical and sexual between a scientist in the field and the people being studied This volume represents anthropology's thoughtful measured reply to the issues raised by this heated controversy Placing the dispute within the context of ongoing debates over the ethics of biomedical research among human populations the contributors to this volume discuss how the interaction between investigators and their subjects can most sensibly be governed They consider the responsibility of the media in disseminating anti scientific and pseudo scientific views and how scientists might best educate journalists to enable them to effectively educate others In the wake of what was widely construed as a major scientific scandal this landmark volume lays out in detail the principles and ground rules of anthropological and scientific fieldwork

Human Adaptability Emilio F. Moran, 2022-05-09 Designed to help students understand the multiple levels at which human populations respond to their surroundings this essential text offers the most complete discussion of environmental physiological behavioral and cultural adaptive strategies available Among the unique features that make Human Adaptability outstanding as both a textbook for students and a reference book for professionals are a complete discussion of the development of ecological anthropology and relevant research methods the use of an ecosystem approach with emphasis on arctic high altitude arid land grassland tropical rain forest and urban environments an extensive and updated bibliography on ecological anthropology and a comprehensive glossary of technical terms There is enhanced emphasis throughout on the role of gender in human adaptability research and on global environmental change as it affects particular ecosystems Students are guided to websites that provide access to relevant material complement the text's coverage of biomes and suggest ways to become active in environmental issues The fourth edition includes updated material on climate change and environmental policy This book is essential reading for students undertaking courses in environmental anthropology and human ecology
