The Potential Of Deep Seismic Profiling For Hydrocarbon Exploration:

The Potential of Deep Seismic Profiling for Hydrocarbon Exploration Bertrand Pinet, Christian Bois, C. Bois, International Lithosphere Program, 1990 The potential of deep seismic profiling for hydrocarbon exploration Bertrand Pinet, 1990

The Potential of Deep Seismic Profiling for Hydrocarbon Exploration, 1989 **Petroleum Geology of Northwest Europe** A. J. Fleet, S. A. R. Boldy, 1999-09 A review of the extensive advances made in the understanding the petroleum geology of the Atlantic margin of northwest Europe of the North Sea and of adjacent areas since the last conference in 1992. In particular the volume focuses on the development of and application of 3D seismic time lapse 4D and other innovative seismic tools the ongoing refinement of sequence and other stratigraphic approaches including the integration of detailed biostratigraphic data the development of modelling at both the reservoir and basin scale which can respond to new data acquisition and be used to assess uncertainties at the reservoir scale and scenarios at the basin scale The Potential of Deep Seismic Profiling for Hydrocarbon Exploration, 1989 **Geodynamics of Rifting** P.A. Ziegler, 2015-12-04 This volume contains papers giving an interdisciplinary review of 12 major rift systems from North and South America Africa Europe and Asia These papers are written by an international group of academic and industrial specialists each of whom is most knowledgeable about the respective rift The analyzed rifts were selected on the basis of availability of an as complete as possible geological and geophysical data base Thirteen papers deal with geodynamic processes governing the evolution of rifts A comprehensive digest of the available stratigraphic structural geophysical and petrological data together with an extensive list of references is provided for each of the analyzed rift systems The megatectonic setting and dynamics of evolution of each basin is discussed Geodynamic models are tested against the record of the analyzed rifts The question of active as against passive rifting is addressed The rifts analyzed range in age from Precambrian to Recent and cover a wide spectrum of megatectonic settings There is discussion of the evolution of rifts in a plate tectonic frame The case histories are followed by discussions addressing the global setting of rifts and geodynamic processes active during the development of rifted basins *Hydrocarbon and Petroleum Geology of France* Alain Mascle, 2012-12-06 The subject of the book will be recent advances in the Petroleum Geology of France including papers on the present exploration and production activity field descriptions regional synthesis and thematic papers on sequence stratigraphy and tectonics A special attention will be given to the illustration maps seismic sections raw data This will be the first attempt to publish one single volume devoted to the petroleum geology of France Geological Survey of Canada, Open File 3119, *Geodynamics of the Alps 3* Claudio L. Rosenberg, Nicolas Bellahsen, 2024-07-23 Geodynamics of the Alps consists of three volumes This third volume is entirely dedicated to Alpine collision It describes and interprets elements of the Alpine chain including Alpine magmatism the formation of external massifs the foreland basin the exhumation of the internal part of the chain and the northern deformation front of the Alps The aim of this book is to create a space for experts on Alpine research to present the state of

the art of specific subjects and provide their own interpretations *Geohydrologic Framework and Hydrologic Conditions in the Albuquerque Basin, Central New Mexico* Condé R. Thorn, Douglas P. McAda, John Michael Kernodle, 1993

Geodynamic Evolution of ... François Roure, Institut français du pétrole, In this volume 27 papers deal successively with thematic aspects of basin formation case history in extensional and compressional basins either in the CIS Republics or in their Western counterparts physical and numerical structural models and other modeling techniques used for petroleum potential appraisal in sedimentary basins These proceedings are of great interest to all geologists dealing with geodynamics of sedimentary basins either in academic institutions or in the petroleum industry Sequence Stratigraphy and Facies Associations Henry W. Posamentier, 2009-04-15 In recent years there has been a virtual explosion of stratigraphic studies utilizing the principles of sequence stratigraphy Although the concept of time stratigraphy is not new the packaging of depositional units into systems tracts and sequences is This new approach has led to the reassessment of areas that in some cases have been the subject of intense geological scrutiny for decades The fundamental principles upon which sequence stratigraphy is based are applicable at a broad range of temporal and physical scales This volume arises from several sessions on sequence stratigraphy held at the Thirteenth International Sedimentological Congress with emphasis on facies associations within a sequence stratigraphic framework *Basement Tectonics* 7 Robert Mason, 2013-04-17 Proceedings of the Seventh International Conference on Basement Tectonics held in Kingston Ontario Canada August 1987 **Petroleum Abstracts** ,1995-04 **Geophysics for Sedimentary Basins** Georges Henry, 1997 This book examines the evolution of geophysical methods for exploring sedimentary basins by describing the internal structure and the nature of the formations found in such basins The applicability of non seismic methods is defined together with the conditions for their use The seismic reflection method is fully described distinguishing between the basic methods for handling routine problems and their adaptation to more specific or complex problems The author then finally covers the emerging techniques of the future Each fully illustrated chapter is a complete topic easy to read with the mathematical derivations banished to the appendices back cover **Exploring the Earth's Crust** C. Prodehl, Walter D. Mooney, 2012 This volume contains a comprehensive worldwide history of seismological studies of the Earth's crust using controlled sources from 1850 to 2005 Essentially all major seismic projects on land and the most important oceanic projects are covered The time period 1850 to 1939 is presented as a general synthesis and from 1940 onward the history and results are presented in separate chapters for each decade with the material organized by geographical region Each chapter highlights the major advances achieved during that decade in terms of data acquisition processing technology and interpretation methods For all major seismic projects the authors provide specific details on field observations interpreted crustal cross sections and key references They conclude with global and continental scale maps of all field measurements and interpreted Moho contours An accompanying DVD contains important out of print publications and an extensive collection of controlled source data location maps and crustal

cross sections Publisher s description *Petroleum and Marine Technology Information Guide* J. Hutcheon,A. Myers,S. Oue,B. Rodden,J. Whittick,2003-09-02 First published in 1981 as the Offshore Information Guide this guide to information sources has been hailed internationally as an indispensable handbook for the oil gas and marine industries **Tertiary Basins of Spain** Peter F. Friend,1996-01-26 This is the first book to deal comprehensively with Spain s tectonic and sedimentary history over the past sixty or so million years During Tertiary times Spain had suffered compressional collision between France and Africa and its Atlantic and Mediterranean coasts had been further modified by extensional rifting

Lithosphere Dynamics and Sedimentary Basins: The Arabian Plate and Analogues Khalid Al Hosani,Francois Roure,Richard ELLISON,Stephen LOKIER,2012-09-14 This book will constitute the proceedings of the ILP Workshop held in Abu Dhabi in December 2009 It will include a reprint of the 11 papers published in the December 2010 issue of the AJGS together with 11 other original papers **Peri-Tethyan Platforms** Institut français du pétrole,1994
