Handbook of Clinical Health Psychology C. Green,R. Meagher,T. Millon,2012-12-06 We seek to throw down the gauntlet with this handbook challenging the hegemony of the behavioral medicine approach to the psychological study and treatment of the physically ill This volume is not another in that growing surfeit of texts that pledge allegiance to the doctrinaire purity of behavioristic thinking or conceptualize their subject in accord with the sterility of medical models Diseases are not our focus nor is the narrow band of behavioral assessment and therapy methodologies Rather we have sought to redefine this

amorphous yet burgeoning field so as to place it squarely within the province of a broadly based psychology specifically the emerging substantive discipline of health psychology and the well established professionalism and diverse technologies of clinical psychology The handbook's title Clinical Health Psychology reflects this reorientation explicitly and Chapter 1 addresses its themes and provides its justifications more fully In the process of developing a relevant and comprehensive health assessment tool the editors were struck by the failure of clinical psychologists to avail themselves of the rich vein of materials that comprise the psychosocial world of the physically ill Perhaps more dismaying was the observation that this field was being mined less than optimally by physicians and nonclinical psychologists

Child and Adolescent Disorders

Sam B. Morgan, Theresa M. Okwumabua, Sam Morgan, 2014-02-04 This book offers empirically based approaches to assessment treatment and prevention of certain childhood disorders encountered by psychologists and other practitioners in child clinical and pediatric psychology settings In so doing it views disorders from a developmental and health psychology perspective that emphasizes prevention of problems as well as positive coping strategies Traditional topics such as autism and childhood depression are addressed as are topics that have only recently emerged in the psychological literature These include childhood diabetes headaches psychological aspects of teenage pregnancy and early development of substance abuse
