

# Note to Parents

Dear Parents,

Happy new school year! I am so excited to be your child's teacher for their 1<sup>st</sup> grade year! I have been teaching 1<sup>st</sup> grade for 18 years and I feel truly lucky to do a job I am passionate about. To be most effective I am writing to ask you to become a partner with me in your child's education. I will only have your child for a short time so I want to make a contribution that will last a lifetime.

I know my teaching must begin with making children feel at home in the classroom and helping all the children come together into a learning community. This community is made up of unique individuals, each with his or her own learning style, strengths, interests, history, hopes, and dreams.

Would you please help me by taking a moment to write about your child: What is your child like? What are his or her interests? What are things you, as a parent, know that would be important for me to know? What has his or her school experiences been like so far? How do you see your child as a learner and as a person? What are your main goals for your child this year? Please use the attached envelope and kindly send in your response by Friday, July 12<sup>th</sup>.

Thank you for your cooperation. I look forward to a wonderful partnership in your child's education.

Sincerely,  
Mrs. Christina Winter

Cheit,2014-04-28 In the 1980s a series of child sex abuse cases rocked the United States The most famous case was the 1984 McMartin preschool case but there were a number of others as well By the latter part of the decade the assumption was widespread that child sex abuse had become a serious problem in America Yet within a few years the concern about it died down considerably The failure to convict anyone in the McMartin case and a widely publicized appellate decision in New Jersey that freed an accused molester had turned the dominant narrative on its head In the early 1990s a new narrative with remarkable staying power emerged the child sex abuse cases were symptomatic of a moral panic that had produced a witch hunt A central claim in this new witch hunt narrative was that the children who testified were not reliable and easily swayed by prosecutorial suggestion In time the notion that child sex abuse was a product of sensationalized over reporting and far less endemic than originally thought became the new common sense But did the new witch hunt narrative accurately represent reality As Ross Cheit

demonstrates in his exhaustive account of child sex abuse cases in the past two and a half decades purveyors of the witch hunt narrative never did the hard work of examining court records in the many cases that reached the courts throughout the nation. Instead they treated a couple of cases as representative and concluded that the issue was blown far out of proportion. Drawing on years of research into cases in a number of states Cheit shows that the issue had not been blown out of proportion at all. In fact child sex abuse convictions were regular occurrences and the crime occurred far more frequently than conventional wisdom would have us believe. Cheit's aim is not to simply prove the narrative wrong; however, he also shows how a narrative based on empirically thin evidence became a theory with real social force and how that theory stood at odds with a far more grim reality. The belief that the charge of child sex abuse was typically a hoax also left us unprepared to deal with the far greater scandal of child sex abuse in the Catholic Church, which incidentally has served to substantiate Cheit's thesis about the pervasiveness of the problem. In sum, *The Witch Hunt Narrative* is a magisterial and empirically powerful account of the social dynamics that led to the denial of widespread human tragedy. [Resources in Education](#), 2001-10

Eisenstock follows several families across the country from their first school tours until the moment they open their admissions letters. He interviews admissions directors, school heads, teachers, educational consultants, and kindergarten tutors who coach both parents and kids. Eisenstock uncovers startling information, starting with how private school admissions directors decide who gets in. Fletcher-Flinn,2015-09-28 Learning to read and to spell are two of the most important cultural skills that must be acquired by children and for that matter anyone learning a second language We are not born with an innate ability to read A reading system of mental representations that enables us to read must be formed in the brain Learning to read in alphabetic orthographies is the acquisition of such a system which links mental representations of visual symbols letters in print words with pre existing phonological sound and semantic comprehension cognitive systems for language Although spelling draws on the same representational knowledge base and is usually correlated with reading the acquisition processes involved are not quite the same Spelling requires the sequential production of letters in words and at beginning levels there may not be a full degree of integration of phonology with its representation by the orthography Reading on the other hand requires only the recognition of a word for pronunciation Hence spelling is more difficult than reading and learning to spell may necessitate more complete representations or more conscious access to them The learning processes that children use to acquire such cognitive systems in the brain and whether these same processes are universal across different languages and orthographies are central theoretical questions Most children learn to read and spell their language at the same time thus the co ordination of these two facets of literacy acquisition needs explication as well as the effect of different teaching approaches on acquisition Lack of progress in either reading and or spelling is also a major issue of concern for parents and teachers necessitating a cross disciplinary approach to the problem encompassing major efforts from researchers in neuroscience cognitive science experimental psychology and education The purpose of this Research Topic is to summarize and review what has been accomplished so far and to further explore these general issues Contributions from different perspectives are welcomed and could include theoretical computational and empirical works that focus on the acquisition of literacy including cross orthographic research      *The Impact of Home and School Environment on Early Literacy and Mathematic Skills* Paola
