Rodney P. Carlisle

The Price Of Power America Since 1945:

The Price of Power Herbert Agar, 1969 **Professional Journal of the United States Army**, 1957 1865 TO THE PRESENT A UNITED STATES HISTORY FOR HIGH SCHOOLS, 1865 **Handbook to Life in America** Rodney P. Carlisle, 2009 Changing International affairs and the forces of technological innovation shaped the lives of Americans in the last decades of the 20th century While the end of the Cold War and the collapse of the Soviet Union gave rise to hopes of peaceful international relations the Gulf War and the attacks of September 11 2001 on the World Trade Center in New York shattered these aspirations In the social sphere cell phones CDs and the Internet completely transformed the ways by which people communicated and conveyed information The election of an African American man to the presidency marked the successful continuation of the struggle for equal civil rights bolstering America's reputation as a radically changing place in this contemporary period *Military Review*, 1957 *Quarterly Review of Military Literature*, 1957 Catalog of Copyright Entries. Third Series Library of Congress. Copyright Office, 1957 The Laws That Shaped America Dennis W. Johnson, 2009-05-31 Dennis W Johnson tells the story of fifteen major laws enacted over the course of two centuries of American democracy for each looking at the forces and circumstances that led to its enactment the often tempestuous political struggles the political players who were key in proposing or enacting the legislation and the impact of the legislation and its place in American history **Power Ties** Paul A. Papayoanou, 1999 Discusses the impact of economic integration on the likelihood of war or peace *Technology and Transformation in the American Electric Utility Industry* Richard F. Hirsh, 2003-11-20 This book illuminates the role of technological stagnation in the decline of the American electric utility industry in the late 1960s and 1970s Unlike other interpreters of the industry's woes Professor Hirsh argues that a long and successful history of managing a conventional technology set the stage for the industry's deterioration After improving steadily for decades the technology that brought unequalled productivity growth to the industry appeared to stall in the late 1960s making it impossible to mitigate the economic and regulatory assaults of the 1970s Unfortunately most managers did not recognize or did not want to believe the severity of the technological problems they faced and they chose to focus instead on issues usually financial or public relations that appeared more manageable Partly as a result of this lack of attention to technological issues the industry found itself in the 1980s challenged by the prospects of deregulation and restructuring

Schneider, 1999 In this history of the other Sixties Gregory L. Schneider traces the influence of Young Americans for Freedom a conservative political group that locked horns with the New Left and spawned many of the

major players in the contemporary conservative movement from the Goldwater campaign in 1964 to Reagan's revolution in the 1980s. *Cadres for Conservatism* reveals how young political conservatives unlike their leftist counterparts avoided fracture in the wake of the Sixties. Rather, YAF continued to serve as a seedbed for future conservative leaders many of whom drew on the contacts and counter activism of their youth to consolidate conservative power. Schneider's talent for trenchant archival research is supplemented by a plethora of detailed interviews with virtually every past national chairman and executive director of the YAF as well as important sponsors such as William F. Buckley, William Rusher and M. Stanton Evans.
