The Primal Bias Wil Jasson, 2003-01-16 NOMINATED FOR THE PULITZER PRIZE ARE CIVILIZATIONS ON DISTANT PLANETS MERE FANTASY ARE ALL SIGNS OF EXTRATERRESTRIAL VISITORS FALSE Thanks to advances in technology we have already found a planet orbiting a star at about the same distance that Earth orbits its own star the sun Such a discovery suggests that intelligent life exists out there perhaps on many worlds But what sort of arrangement could repeatedly lead to such an awesome outcome Nature has an orientation toward life a built in Primal Bias that acts in a manner both subtle and mighty somewhat like gravitation for instance The effects of this Primal Bias besides being profound are highly diverse Still those effects tend to favor the living state in one way or another so that they produce a consistent partiality toward life As a result organisms emerge and evolve not just through chance occurrences but with the

strong support of a special Bias As a predisposition the Primal Bias functions largely through a Master System a seeming hodgepodge of powerful expedients and constraints that tend each in its own mode to promote whatever may help life These expedients and constraints act as a system only in the very long term and only because all are consistent with the Primal Bias They are generally associated with codes including codes as rudimentary as valence or as advanced as the genetic code The Primal Bias has a critical impact on both essence and evolution from the earliest forms of existence to the most advanced forms of life And that impact is cumulative Conceivably the Primal Bias is the key to a grand scheme underlying the constitution of the universe This is science of the new millennium a way to figure out some of the mysteries of the cosmos yet the presentation is informal non mathematical and strikingly illustrated Anyone interested in science or nature or in life on other worlds can get carried away To order The Primal Bias click on the table above or visit a bookstore or Amazon com etc Or telephone 1 888 280 7715 during business hours toll free
