Japanese culture will find this book particularly useful **Cartoon Cultures** Anne Cooper-Chen, 2010 From 1993 to 2003 exports of Japan's cartoon arts tripled in value to 12.5 billion. Fan phenomena around the world in U.S. malls, teen girls flock to purchase the latest Fruits Basket graphic novel in Hungary, young people gather for a summer cosplay costume dress-up event, illustrate the global popularity of manga and anime. Drawing on extensive research and more than 100 original interviews, Anne Cooper-Chen explains how and why the un-Disney has penetrated nearly every corner of the planet. This book uses concepts such as cultural proximity, uses and gratifications, and cultural variability to explain cross-cultural adaptations in a broad international approach. It emphasizes that overseas acceptance has surprised the Japanese who create manga and anime primarily for a domestic audience. Including some sobering facts about the future of the industry, the book highlights how overseas enthusiasm could actually save a domestic industry that may decline in the contracting and graying country of its birth. Designed for courses covering international mass media, media and globalization, and introduction to Japanese culture, the book is written primarily for undergraduates and includes many student-friendly features such as a glossary, timeline, and source list. **Asian Self-Representation at World's Fairs** William Peterson, 2025-10-01

International expositions or world's fairs are the largest and most important stage on which millions routinely gather to directly experience, express, and respond to cultural difference. Rather than looking at Asian representation at the hands of colonizing powers, something already much examined, *Asian Self-Representation at World's Fairs* instead focuses on expressions of an empowered Asian self-representation at world's fairs in the West after the so-called golden age of the exhibition. New modes of representation became possible as the older exhibitionary order of earlier fairs gave way to a dominant performative order, one increasingly preoccupied with generating experience and affect. Using case studies of national representation at selected fairs over the hundred-year period from 1915 to 2015, this book considers both the politics of representation as well as what happens within the imaginative worlds of Asian country pavilions where the performative has become the dominant mode for imprinting directly on human bodies. **MUSIC AND DEEP MEMORY** Bryan Carr and Richard Dumbrill, 2018-08-06
