Redefining Instructional Leadership John R. Jones, Misty Henry, 2022-10-01

Redefining Instructional Leadership: The Skills and Energy Required of an Instructional Leader focuses on how principals must be instructional leaders by first making building relationships a priority. Then with those relationships that are built the leader will earn trust from their teachers which will give them the influence they need to lead them to better levels of performance and better performance leads to greater depths of student achievement.

Redefining Instructional Leadership goes beyond simply stating theory and summarizing research about what schools need from instructional leaders by emphasizing what instructional leaders should do and how to do it. This book explains the steps instructional leaders must learn and put into practice if their desire is to become a truly dynamic leader that will have a positive impact on teaching and learning.

Supervision Across the Content Areas Sally J. Zepeda, 2014-05-22 You became a school leader after succeeding in your particular content area and/or grade level. Now you're responsible for the entire school. You are accountable for everything that goes on including results from those who teach outside your areas of original expertise.

Supervision Across the Content Areas provides tools and strategies to help you effectively supervise all of your teachers including those in content areas or grade levels in which you may not have had personal classroom experience. While focusing on four key content areas: Mathematics, Science, English Language Arts, and Social Studies, this book also provides supervision tools for other content areas: foreign languages, fine arts, physical education, etc. Also included are tools and strategies to help you supervise teachers who use instructional strategies such as differentiated instruction, Socratic Seminars, cooperative learning, and inquiry; apply local and national standards to frame your instructional program; ensure accountability of teachers who use multiple intelligences, brain-based learning, and other innovations.

Supervision Jeffrey Glanz, Sally J. Zepeda, 2015-10-30

Supervision: New Perspectives for Theory and Practice co-edited by two prominent scholars in the field, Jeffrey Glanz and Sally Zepeda, draws attention to supervision as a function that is often misunderstood, underappreciated, and frequently controversial. Much has changed in the last two decades in the education world. These changes have inevitably influenced the theory and practice of supervision. This text includes some of the top scholars in the field in the USA to offer their insights to important topics and issues in supervision. To strike a balance, the editors also included award-winning practitioners who share their insights about supervision. We hope that this volume raises awareness to several critical issues that affect teachers, administrators, and policy makers. With the range of topics associated with supervision, we believe that the authors

offer an informed and lively discussion of supervision in the present and future contexts of schools Through our efforts we believe that the multiple contexts in which supervision unfolds are examined alongside trends including high stakes testing the uses of data the work superintendents do to supervise principals and the type of supervision that builds a just and caring school culture that is culturally relevant and respectful for teachers and leaders *Standards for Instructional Supervision* Stephen P.
