Morbidity, Performance and Quality in Primary Care Gert P. Westert, Lea Jabaaij, François G. Schellevis, 2006 This book is based on the findings of a nationwide study the aim of which was to analyse general practitioners performance as

gatekeepers of the Dutch healthcare system The study was undertaken along six themes the health of the population inequalities in health utilisation of care quality of care communication organisation and workload Morbidity Performance and Quality in Primary Care involves 400 000 patients 1 5 million recorded GP patient contacts and 2 1 million drug prescriptions This survey appears at a timely moment It coincides with the recent interest in primary care arising not only from the growing importance of cost containment in healthcare but also from the now firmly established association between the life expectancy of a population and the existence of a strong primary care sector The international interest in the Dutch situation is reflected in several chapters where experts from all over the world put Dutch general practice into an international perspective

EBOOK: The New Primary Care Bernard Dowling, Caroline Glendinning, 2003-10-16 The modernization of the NHS is at the heart of the UK government's policies for public sector services This modernization programme represents the most radical and ambitious restructuring of the NHS since its inception in 1948 The new Primary Care Groups and Trusts PCG Ts are the main organizational mechanism for delivering the modernization agenda and are therefore key to the success or otherwise of these reforms To date there has been no comprehensive evaluation of how PCG Ts have been performing in implementing the modernization programme this book fills that important gap in knowledge It provides a strong text of first evidence about the performance of PCG Ts to date this forms the basis for discussions about future success and a benchmark for future research The New Primary Care will be an essential resource for all advanced students of health care as well as academics researchers and policy makers

The Transformation of the Psyche in British Primary Care, 1870-1970 Rhodri Hayward, 2014-02-25 Conflicting models of selfhood have become central to debates over modern medicine Yet we still lack a clear historical account of how this psychological sensibility came to be established The Transformation of the Psyche in British Primary Care 1880 1970 will remedy this situation by demonstrating that there is nothing inevitable about the current connection between health identity and personal history It traces the changing conception of the psyche in Britain over the last two centuries and it demonstrates how these changes were rooted in transformed patterns of medical care The shifts from private medicine through to National Insurance and the National Health Service fostered different kinds of relationship between doctor and patient and different understandings of psychological distress The Transformation of the Psyche in British Primary Care 1880 1970 examines these transformations and in so doing provides new critical insights into our modern sense of identity and changing notions of health that will be of great value to anyone interested in the modern history of British medicine
