Surviving Adversity The Sinagua Of Lizard Man Village:

Surviving Adversity Kathryn Ann Kamp, John Charles Whittaker, 1999 Based on more than ten years of field work this is the only modern interpretive site report on the Sinagua culture Lizard Man Village is one of many small settlements in the Flagstaff vicinity occupied by the Sinagua between AD 1050 and 1300 Generally considered affiliated with the Mogollon the major archaeological culture group in central Arizona the Sinagua inhabited a region where three distinct groups intersected the Mogollon the Hohokam and the Anasazi Sinagua survival strategy in this very arid region combined dispersed agriculture with hunting and foraging It appears that an essentially egalitarian social system allowed flexibility to maximize wild resources and potential agricultural sites or vice versa The area is characterized by a number of small villages that probably consisted of only a few families each Precisely because Lizard Man Village is typical of such sites the authors chose it for intensive fieldwork According to them in its very ordinariness lies its importance Based on the site report the authors provide interpretations for comparison to other sites in the Southwest as well as a detailed consideration of what went on at a small Sinagua village Using material assemblages they present a picture of social organization through successive culture phases

Archaeobiology Kristin Sobolik, 2003-04-28 Inclusion of botanical and zoological remains in archaeological analysis has dramatically increased since the advent of the New Archaeology Yet most archaeologists have a limited knowledge of what archaeobiologists do and how their work can improve archaeological research and interpretation In this handy volume Kristin Sobolik outlines the major activities of archaeobiologists the kinds of analyses they can provide to an archaeological project and how biological specialists could and should be involved in project design and implementation She also outlines factors that influence preservation of plant and animal remains and how project archaeologists should properly collect and analyze specimens This brief work is an important guide for students starting in archaeobiology and for other archaeologists who use their work

Archaeology in America Linda S. Cordell, Kent Lightfoot, Francis McManamon, George Milner, 2008-12-30 The greatness of America is right under our feet The American past the people battles industry and homes can be found not only in libraries and museums but also in hundreds of archaeological sites that scientists investigate with great care These sites are not in distant lands accessible only by research scientists but nearby almost every locale possesses a parcel of land worthy of archaeological exploration Archaeology in America is the first resource that provides students researchers and anyone interested in their local history with a survey of the most important archaeological discoveries in North America Leading scholars most with an intimate knowledge of the area have written in depth essays on over 300 of the most important archaeological sites that explain the importance of the site the history of the people who left the artifacts and the nature of the ongoing research Archaeology in America divides its coverage into 8 regions the Arctic and Subarctic the Great Basin and Plateau the Great Plains and Rocky Mountains the Midwest the Northeast the Southeast the Southwest and the West Coast Each entry provides readers with an accessible overview of the archaeological site as well as books and articles

for further research Archaeology of the Night Nancy Gonlin, April Nowell, 2017-12-15 How did ancient peoples experience view and portray the night What was it like to live in the past when total nocturnal darkness was the norm Archaeology of the Night explores the archaeology anthropology mythology iconography and epigraphy of nocturnal practices and questions the dominant models of daily ancient life A diverse team of experienced scholars uses a variety of methods and resources to reconstruct how ancient peoples navigated the night and what their associated daily and nightly practices were This collection challenges modern ideas and misconceptions regarding the night and what darkness and night symbolized in the ancient world and it highlights the inherent research bias in favor of daytime archaeology Numerous case studies from around the world including Oman Mesoamerica Scandinavia Rome Great Zimbabwe Indus Valley Peru and Cahokia illuminate subversive social ritual domestic and work activities such as witchcraft ceremonies feasting sleeping nocturnal agriculture and much more Were there artifacts particularly associated with the night Authors investigate individuals and groups both real and mythological who share a special connection to nighttime life Reconsidering the archaeological record Archaeology of the Night views sites artifacts features and cultures from a unique perspective This book is relevant to anthropologists and archaeologists and also to scholars of human geography history astronomy sensory studies human biology folklore and mythology Contributors Susan Alt Anthony F Aveni Jane Eva Baxter Shadreck Chirikure Minette Church Jeremy D Coltman Margaret Conkey Tom Dillehay Christine C Dixon Zenobie Garrett Nancy Gonlin Kathryn Kamp Erin Halstad McGuire Abigail Joy Moffett Jerry D Moore Smiti Nathan April Nowell Scott C Smith Glenn R Storey Meghan Strong Cynthia Van Gilder Alexei Vranich John C Whittaker Rita Wright **Grapevine Canyon Wind Project** ,2012 **People and Plants in Ancient Western North America** Paul E. Minnis, 2004 The environmental diversity of North America is astounding from circumpolar tundra with a small number of plants more than a few centimeters tall to the lush semitropical forests of the southeastern United States and the Caribbean Basin No less remarkable is the record of plant usage by the various indigenous peoples who have been living here for more than 12 000 years For the vast majority of this time their livelihood food shelter fuel and medicine depended on their knowledge and use of the plants that surrounded them The most comprehensive overview in more than half a century on the interconnectedness of people and plants this book and its companion volume People and Plants in Ancient Eastern North America present the latest information on three major topics the uses of native plants the history of crops and their uses and the impact of humans on their environment They not only contribute to our understanding of the lives of prehistoric people but also serve as guides for designing sustainable living today The Archaeology of Childhood Güner Coşkun, 2015-11-16 Children existed in ancient times as active participants in the societies in which they lived and the cultures they belonged to Despite their various roles and in spite of the demographic composition of ancient societies where children comprised a large percentage of the population children are almost completely missing in many current archaeological discourses To remedy this The Archaeology of Childhood aims to instigate interdisciplinary dialogues

between archaeologists and other disciplines on the notion of childhood and children and to develop theoretical and methodological approaches to analyze the archaeological record in order to explore and understand children and their role in the formation of past cultures Contributors consider how the notion of childhood can be expressed in artifacts and material records and examine how childhood is described in literary and historical sources of people from different regions and cultures While we may never be able to reconstruct every last aspect of what childhood was like in the past this volume argues that we can certainly bring children back into archaeological thinking and research and correct many erroneous and gender biased interpretations

American Flintknappers John C. Whittaker, 2021 Whittaker s American Flintknappers will be an important resource for students of modern replication studies This publication not only presents information on modern non academic flintknappers it also addresses issues of interest to anyone studying folk technologies in general The Journal of the Royal Anthropological Institute This is a superb book authored by one of the only people with both the anthropological background and the connections in the world of contemporary flintknapping to write it

It really is unlike any work I'm aware of in lithics studies. Michael Stafford, Director, Cranbrook Institute of Science, Making arrowheads, blades, and other stone tools was once a survival skill and is still a craft practiced by thousands of flintknappers around the world. In the United States, knappers gather at regional knapping events to socialize, exchange ideas, and material; buy and sell both equipment and knapped art; and make stone tools in the company of others. In between these gatherings, the knapping community stays connected through newsletters and the Internet. In this book, avid knapper and professional anthropologist John Whittaker offers an insider's view of the knapping community. He explores why stone tools attract modern people and what making them means to those who pursue this art. He describes how new members are incorporated into the knapping community, how novices learn the techniques of knapping and find their roles within the group, how the community is structured, and how ethics, rules, and beliefs about knapping are developed and transmitted. He also explains how the practice of knapping relates to professional archaeology, the trade in modern replicas of stone tools, and the forgery of artifacts. Whittaker's book thus documents a fascinating subculture of American life and introduces the wider public to an ancient and still rewarding craft.
