Jackson, 2018-09-22 We have all witnessed media reports of the aftermath of mass victim attacks We see the carnage and we know that attackers do not show mercy Victims were innocent and were targeted simply for being a part of a small or large group of people Whether a bomb semi automatic weapon knife or vehicle the attacker strikes quickly and without mercy Victims may have been dining in a restaurant relaxing at a bar participating in school classes attending a workplace activity or simply walking on the street Because of the horrific and effective nature of such attacks we are often left fearing that little to nothing can be done if the unthinkable happens and we are caught in such a merciless attack Surviving Mass Victim Attacks presents specific and valuable strategies for survival if the unthinkable happens and serves as a practical guide to anyone who wishes to be more knowledgeable and better prepared if caught in an attack themselves Gary Jackson is a behavioral psychologist threat expert with operational experience who analyzes how victims have managed to survive past mass victim attacks committed by international terrorists domestic terrorists self radicalized terrorists those with mental health issues and those driven by hate and bias to present strategies that anyone can use to increase their chances of survival if the unthinkable happen Throughout different types of mass victim attackers their methods how and what they target and how to use characteristics of the location to increase survival are addressed The book uses real life examples to illustrate survival the strategies presented are easily understood and do not require special skills to execute By reading Surviving Mass Victim Attacks you will be better able to know what to expect how to prepare proactively and how to respond in a way that will save your life *Countering the Proliferation of Weapons of Mass Destruction* Thanos P Dokos, 2020-07-24 As counter proliferation is expected to become the central element in the new national security policy of the US such actions will constitute a central element of every major international conflict in the first decades of the 21st century One of the most important geostrategic phenomena of the past decade has been the extraordinary diffusion of war making capabilities from the developed North to the developing South In the eyes of some proliferant states possessing nuclear biological and chemical NBC weapons would not only add to their regional stature but would also offer an asymmetrical counter to the West's massive superiority in conventional forces In the Eastern Mediterranean and the Middle East a number of countries are assumed to possess varying levels of NBC weapons capabilities Reasons for concern include the fact that such weapons have been used in the past the region's geographic proximity to Europe and the vital interests of

the West which is prepared under certain circumstances to use force to protect them the multiplicity of conflicts and other security problems and the general instability in the region including the spread of religious extremism This important and timely book assesses in detail the accuracy of predictions and perceptions about a possible military threat from the Southern Mediterranean Muslim world and their impact on NATO s political and military posture Thanos P Doxos presents an assessment of the Alliance s options for dealing with the problem This book represents an invaluable topical resource for researchers and policy makers
