The Shock of Recognition Lewis

Pyenson,2020-10-12 In The Shock of Recognition Lewis Pyenson uses a method called Historical Complementarity to identify the motif of non figurative abstraction in modern art and science He identifies the motif in Picasso s and Einstein s educational environments He shows how this motif in domestic furnishing and in urban lighting set the stage for Picasso s and Einstein s professional success before 1914 He applies his method to intellectual life in Argentina using it to address that nation s focus on an inventory of the natural world until the 1940s its adoption of non figurative art and nuclear physics in the middle of the twentieth century and attention to landscape painting and the wonder of nature at the end of the century
