Syntactic Argumentation and the Structure of English SASE presents the major theoretical developments in generative syntax and the empirical arguments motivating them Beautifully and lucidly written it is an invaluable resource for working linguists as well as a pedagogical tool of unequalled depth and breadth The chief focus of the book is syntactic argumentation Beginning with the fundamentals of generative syntax it proceeds by a series of gradually unfolding arguments to analyses of some of the most sophisticated proposals It includes a wide variety of problems that guide the reader in constructing arguments deciding between alternative analyses of syntactic constructions and alternative theoretical formulations Someone who has worked through the problems and arguments in this book will be able to apply the skills in argumentation it develops to novel issues in syntax While teaching syntactic argumentation SASE covers the major empirical results of generative syntax Its contents include

- 1 Transformations in single clause sentences
- 2 Complementation and multi clause transformations
- 3 Universal principles governing rule interaction the cycle and strict cyclicity
- 4 Movement rules

- 2 For linguists it is a sourcebook of classical analyses and arguments with some new arguments bearing on classical issues
- 3 For scholars teachers and students in related fields it is a comprehensive guide to the major empirical and theoretical developments in generative syntax

SASE contains enough material for a two semester or three quarter sequence in syntax Because it assumes no previous background it can be used as the main text in an introduction to syntax Since it covers a wide range of material not available in other texts it is also suitable for intermediate and advanced syntax courses and as a supplementary source in more specialized courses and courses in other disciplines A storehouse of classical and original arguments SASE will prove to be of lasting value to the teacher the student and researchers in both linguistics and related fields
