 Digital Age** Georg Rehm,Hans Uszkoreit,2012-07-04 This white paper is part of a series that promotes knowledge about
 language technology and its potential It addresses educators journalists politicians language communities and others The
 availability and use of language technology in Europe varies between languages Consequently the actions that are required
 to further support research and development of language technologies also differ for each language The required actions
 depend on many factors such as the complexity of a given language and the size of its community META NET a Network of
 Excellence funded by the European Commission has conducted an analysis of current language resources and technologies
 This analysis focused on the 23 official European languages as well as other important national and regional languages in
 Europe The results of this analysis suggest that there are many significant research gaps for each language A more detailed
 expert analysis and assessment of the current situation will help maximise the impact of additional research and minimize
 any risks META NET consists of 54 research centres from 33 countries that are working with stakeholders from commercial
 businesses government agencies industry research organisations software companies technology providers and European
 universities Together they are creating a common technology vision while developing a strategic research agenda that shows
 how language technology applications can address any research gaps by 2020 **Svenskarna och deras fäder de senaste
