Dictionary of XML Technologies and the Semantic Web Vladimir Geroimenko, 2012-12-06 The emerging Second Generation Web is based entirely on XML and related technologies It is intended to result in the creation of the Semantic Web on which computers will be able to deal with the meaning semantics of Web data and hence to process them in a more effective and autonomous way This new version of the Web introduces a multitude of novel concepts terms and acronyms Purpose Scope and Methods This dictionary is an effort to specify the terminological basis of emerging XML and Semantic Web technologies The ultimate goal of this dictionary is even broader than just to define the meaning of new words it aims to develop a proper understanding of these leading edge technologies To achieve this comprehensible definitions of technical terms are supported by numerous diagrams and code snippets clearly annotated and explained The main areas covered in this dictionary are 1 XML syntax and core technologies such as Namespaces Infoset and XML Schema 2 all the major members of the XML family of technologies such as XSLT XPath and XLink 3 numerous XML based domain specific languages such as NewsML News Markup Language 4 the concept and architecture of the Semantic Web 5 key Semantic Web technologies such as RDF Resource Description Framework RDF Schema and OWL Web Ontology Language and 6 Web services including WSDL Web Services Description Language and SOAP Simple Object Access Protocol The Internet Encyclopedia, Volume 1 (A - F), 2004-11-11 The Internet Encyclopedia in a 3 volume reference work on the internet as a business tool IT platform and communications and commerce medium **The Internet Encyclopedia, 3 Volume Set** Hossein Bidgoli, 2004 The Handbook of Information Security is a definitive 3 volume handbook that offers coverage of both established and cutting edge theories and developments on information and computer security The text contains 207 articles from over 200 leading experts providing the benchmark resource for information security network security information privacy and information warfare Midwest Forthcoming Books Rose Arny, 2002 **Proceedings of the 2003 ACM Symposium on Document Engineering** Christine Vanoirbeek, Cécile Roisin, Ethan V. Munson, 2003 We introduce a lazy XSLT interpreter that provides random access to the transformation result This allows efficient pipelining of transformation sequences Nodes of the result tree are computed only upon initial access As these computations have limited fan in sparse output coverage propagates backwards through the pipeline In comparative measurements with traditional eager implementations our approach is on par for complete coverage and excels as coverage becomes sparser In contrast to eager evaluation lazy evaluation also admits infinite intermediate results thus extending the design space for transformation sequences To demonstrate that lazy evaluation preserves the semantics of XSLT we reduce XSLT to the lambda calculus via a functional language While this is possible for all languages most imperative languages cannot profit from the confluence of lambda as only one reduction applies at a time **Books in Print Supplement**, 2002 *Visualizing Information Using SVG and X3D* Vladimir Geroimenko, 2005-01-04 This is the first book devoted to both SVG and X3D as a new and universal

means of visualizing information It presents the state of the art research emerging in this novel area and introduces SVG and X3D fundamentals and leading authoring tools The key topics covered include The foundations of SVG and X3D Data information knowledge and network visualization Advanced and distributed user interfaces Visualizing metadata and the Semantic Web Visual interfaces to Web services New trends and paradigms in publishing and Interactive TV Displaying geographically referenced data and chemical structures Advanced use of Adobe Illustrator and X3D Edit authoring tools This book will be essential reading not only for researchers Web developers and graduate students but also for undergraduates and everyone who is interested in using the next generation computer graphics on their websites
