Sweet And Sour Capitalism:

Sweet and Sour Capitalism Donald J. Senese, 1985 *Pathways from the Periphery* Stephan Haggard, 1990 *Pathways from the Periphery* is an innovative interpretation of the development of the newly industrializing countries NICs which now dominate Third World industry and manufacturing trade While such countries as Brazil and Mexico have achieved industrialization through strategies intended to foster self reliance the East Asian NICs South Korea Taiwan Hong Kong and Singapore have grown rapidly through an aggressive policy promoting the export of manufactured goods Stephan Haggard provides the first comprehensive comparison of the politics of industrialization in these East Asian and Latin American countries and offers new evidence on current issues in comparative political economy including the implications of different growth paths for dependency equity and democracy Recognizing the influence on development strategies of external shocks such as depression war and reduced access to foreign capital Haggard emphasizes the importance of domestic political institutions for economic decision making The East Asian NICs are characterized by close but regulated business government alliances weak labor movements and politically insulated and administratively capable states factors Haggard shows that have facilitated flexible and coherent industrial policies He argues that domestic policy choices can shape the external constraints states face The author considers in detail why Latin America's long standing efforts to achieve self reliance have ironically resulted in a dependence on international capital greater than that of the East Asian countries Addressing a long standing debate on the relationship between industrialization strategy and regime type Haggard carefully assesses the connection between growth and democratic politics Despite their authoritarian growth models the Asian NICs have he observes achieved greater equity than their Latin American counterparts Although the success of export led growth has in the past been associated with authoritarian rule Haggard argues that no compelling theoretical reasons preclude democratic governments from achieving strong economic performance Breaking new ground in theoretical inquiry and empirical research *Pathways from the Periphery* will be welcomed by political economists scholars and students of comparative politics historians of Asian and Latin American public policy and others concerned with the challenge of economic development

Human Geography Derek Gregory, Ron Martin, Graham Smith, 1994 Based on the premise that the cross fertilization of ideas and concepts between human geography and the social sciences is central to the continuing process of rethinking human geography these essays examine some of the major issues and questions facing the world today *Achieving Industrialization in East Asia* Helen Hughes, 1988-11-10 This book examines the economic success of the industrializing economies of East Asia Judged in terms of economic growth or by a combination of economic and welfare criteria this group of East Asian countries has established a clear lead over other developing areas of the world *The Role of the State in Taiwan's Development* Joel D. Aberdach, 2015-05-20 These essays are a product of a co operative research project between American and Taiwanese social scientists Of particular interest is the chapter discussing a comparative study of industrial

policy productivity growth and structural change in manufacturing The Political Economy of the New Asian Industrialism Frederic C. Deyo, 2018-08-06 The newly industrializing countries NICs of East Asia have undergone rapid economic expansion over the past twenty years Unlike NICs elsewhere in the Third World those in the Pacific basin South Korea Taiwan Singapore and Hong Kong have managed to achieve almost full employment a relatively egalitarian distribution of income and the virtual elimination of poverty In this collection of essays nine development specialists explore the Asian NICs exceptional ability to capitalize on the favorable economic environment of the 1960s and then to adapt flexibly to worsening conditions in the 1970s and 1980s **Sustainable Diplomacies** C. Constantinou, J. Der Derian, James Der Derian, 2010-08-11 Sustainable Diplomacies looks at how to create conditions for the reconciliation of rival ways of living the formation of durable relationships and the promotion of global peace and security The authors draw inspiration from the history of diplomatic thought as well as from environmental anthropological religious and postcolonial studies The World & I, 1991 **Crude Capitalism** Adam Hanieh, 2024-09-17 This expansive history traces the hidden connections between oil and capitalism from the late 1800s to the current climate crisis Beyond simplistic narratives that frame oil as prize or curse Crude Capitalism uncovers the surprising ways that oil is woven into the fabric of our modern world the rise of an American centered global order the breakdown of Empire and anti colonial rebellion contemporary finance and US dollar hegemony debt and militarism and the emergence of new forms of synthetic consumption Much more than an energy source or transport fuel oil has a foundational place in all aspects of contemporary life no challenge to the fossil fuel industry can be effective without taking this fact seriously Crude Capitalism maps the varied geographies of oil including the rise of OPEC the importance of revolutionary and Post Soviet Russia the crucial role of African upstream reserves and the new petrochemical circuits that link the Middle East China and East Asia The book provides an original and fine grained empirical analysis of corporate ownership and control including refining and petrochemicals By exposing these structures of power and placing oil in capitalism the book makes an essential contribution to debates around oil dependency and the struggle for climate justice **Goodbye Cinema, Hello Cinephilia** Jonathan Rosenbaum, 2010-10-15 The esteemed film critic Jonathan Rosenbaum has brought global cinema to American audiences for the last four decades His incisive writings on individual filmmakers define film culture as a diverse and ever evolving practice unpredictable yet subject to analyses just as diversified as his own discriminating tastes For Rosenbaum there is no high or low cinema only more interesting or less interesting films and the pieces collected here from an appreciation of Marilyn Monroe s intelligence to a classic discussion on and with Jean Luc Godard amply testify to his broad intellect and multi faceted talent Goodbye Cinema Hello Cinephilia gathers together over fifty examples of Rosenbaum s criticism from the past four decades each of which demonstrates his passion for the way we view movies as well as how we write about them Charting our changing concerns with the interconnected issues that surround video DVDs the Internet and new media the writings collected here also highlight Rosenbaum s polemics

concerning the digital age From the rediscovery and recirculation of classic films to the social and aesthetic impact of technological changes Rosenbaum doesn't disappoint in assembling a magisterial cast of little known filmmakers as well as the familiar faces and iconic names that have helped to define our era As we move into this new decade of moviegoing one in which Hollywood will continue to feel the shockwaves of the digital age Jonathan Rosenbaum remains a valuable guide Goodbye Cinema Hello Cinephilia is a consummate collection of his work not simply for fans of this seminal critic but for all those open to the wide variety of films he embraces and helps us to elucidate
