Modernizing Global Health Security to Prevent Detect and Respond explores through thoughtful thorough and diverse scientific review and analyses factors that have led to recent public health emergencies and offers a vision for a better protected global environment The authors consider the history of global health security governance and legal structures with an eye toward novel approaches for the present and future The book presents a vision for a more protected and safer global public health future with the actions needed to achieve it to prevent detect and respond to re emerging threats Its aim is to chart a way forward with the understanding that future pandemics must and can be prevented Major topics examined from a public health perspective include global health security the growing concept of One Health epidemic and pandemic prevention detection and response reviews of past e g Ebola MERS CoV Zika and COVID 19 public health emergencies of international concern roles of information and communication technology humanmade public health threats and legal and ethical issues e g viral sovereignty trust and transparency Modernizing Global Health Security to Prevent Detect and Respond provides the academic substance and quality for researchers and practitioners to deeply understand the why of health emergencies and most importantly what we can and should do now to prepare Highlights re emerging past and future threats to public health e g climate change antibiotic resistance failures of societal sectors to work together Discusses new visions for global health security in each chapter Considers how to leverage technological innovations to advance public health Includes practical examples through case studies from around the world *The Prevention of Second Primary Cancers* David I. McLean,2008-01-01 A second primary cancer SPC is a new primary cancer developing in a person with a history of cancer at a new site or tissue and subsequent to the initial cancer Advances in cancer treatment have led to marked improvements in cancer cure rates over the past 30 years and the control of risk factors has further increased longevity Still cancer survivors are at increased risk not only for recurrence of the primary cancer but also for the development of second primary malignancies the latter being especially true for survivors of childhood cancer SPCs are now more common and research into them has intensified This monograph provides a synthesis of the current research on SPC culminating in pertinent summary charts covering the whole spectrum of first and second primary cancers and the association between them Readers will gain a general understanding of the epidemiology and of the excess risk of SPCs following an implicated first malignancy The known or suspected etiologic factors for SPCs are identified and the field is further narrowed to those factors that are modifiable in practice Effective preventive measures that might reduce the burden of SPC both for individuals and across at risk populations are presented Providing practical guidance in terms of possibilities and priorities this monograph will be a valuable tool for oncologists general practitioners and health administrators

Prevention , The Criminalisation of Youth Francis Bailleau,Yves Cartuyvels,2010 Transformations to the criminal

justice system in Western societies are often linked with broader social and cultural changes and this work presents the recent changes in juvenile justice in Canada and nine European countries and the sociopolitical context in which they take place. The study provides a comparison of the sentencing practices of each country focusing on three dimensions related to the sanction practices: the custodial sanctions, the alternative sanctions, and the extension of the judicial thinking into relative fields such as school training and social policies. With clear and thoroughly developed research methods, this analysis illustrates that changes in juvenile justice policies are not specifically the result of differences in crime rates or the evolution of deviant youth behavior but rather the effect of complex interactions with a variety of social, economical, cultural, and political factors.
