Intimate Frontiers Albert L. Hurtado, 2016-04-25 This book reveals how powerful undercurrents of sex gender and culture helped shape the history of the American frontier from the 1760s to the 1850s Looking at California under three flags those of Spain Mexico and the United States Hurtado resurrects daily life in the missions at mining camps on overland trails and sea journeys and in San Francisco In these settings Hurtado explores courtship marriage reproduction and family life as a way to

understand how men and women whether Native American Anglo American Hispanic Chinese or of mixed blood fit into or reshaped the roles and identities set by their race and gender Hurtado introduces two themes in delineating his intimate frontiers One was a libertine California and some of its delights were heartily described early in the 1850s Gold dust was plentier than pleasure pleasure more enticing than virtue Fortune was the horse youth in the saddle dissipation the track and desire the spur Not all the times were good or giddy and in the tragedy of a teenage domestic who died in a botched abortion or a brutalized Indian woman we see the seamy underside of gender relations on the frontier The other theme explored is the reaction of citizens who abhorred the loss of moral standards and sought to suppress excess Their efforts included imposing all the stabilizing customs of whichever society dominated California during the Hispanic period arranged marriages and concern for family honor were the norm among the Anglos laws regulated prostitution missionaries railed against vices and proper women were brought in to help civilize the frontier

Frohlich,2009-04 Human nature holds the intelligence of life It provides a psychology that is much stronger more effective and more reliable than the psychology society teaches us This psychology taps into the evolutionary survival experience of our species which occupied most of human history It was the period when the species evolved and our ancestor survived as a hunter and gatherer More than 99% of human history is encoded in the

DNA of our genes and lastingly etched into the human psyche Our natural psychology the human psyche is the result of evolutionary adaptation The psyche provides the genetic capacity for behavioral mental and spiritual adaptation It supports the gratification of our needs And it contains the blueprint of human life The book is about human nature and human survival Human nature that is the human psyche has survival value The book introduces a metapsychology that refers to the Jungian archetypes and the survival capabilities inherent in the psyche Like all living organisms and forms of life we possess an innate capacity for survival By awakening this evolutionary intelligence we gain access to the primordial power and wisdom of the archetypal psyche This innate psychology transcends the cultural conditioning that has shaped us all and erects an entirely different reference system making us look at life in a new way We live in a world that reflects human nature and we are well equipped to survive in it Beyond that there is also something in us that resonates with a larger context Our psychological constitution relates us to the outer realities of nature and cosmos It is in this sense that we partake in the evolution of life on this planet and in the larger design of a cosmic universe This primary psyche is shared by all humanity as part of a common biological and psychological history
