Germans Going Global Anke S. Biendarra, 2012-10-30 Germans Going Global is the first monograph in English to address in depth the interrelatedness between contemporary German literature and globalization In an interdisciplinary framework and through detailed readings of a wide variety of texts the study shows how the challenges globalization has posed for Germany over the last two decades have been manifested and reimagined in aesthetic production Analyses of the literary marketplace and public debates illuminate the more material sides of this development The study also analyzes the ways in which German language writers born between 1955 and 1975 such as Chr Kracht Th Meinecke J Hermann S Berg F Illies K R ggla J v D ffel and G Hens respond to the pressures of globalizing factors and how these have influenced notions of authorship and literary aesthetics It shows how narratives dealing with the neoliberal work world global travel and the aftermath of 09 11 implicitly comment on contemporary debates on globalization its socio economic nature and the impact for local culture By presenting a literary history of the present Germans Going Global deepens the reader s understanding of contemporary Germany and its cultural production

Japanese and German Enterprises Toshio Yamazaki, 2024-12-09 The objective of this book is to analyze and compare the processes of corporate expansion of postwar Japan and Germany It examines the evolution of distinctive Japanese and German business management styles through the adoption of American management methods thereby establishing a system of industrial concentration in contrast to the US de concentration policy This is the first time that the book draws on a range of topics related to business administration

including the concentration of enterprises management and production systems management education marketing organizational structure and corporate governance The book compares the Japanese and German models Japanese enterprises developed a management style that was suitable for American and Japanese markets in part due to the underdeveloped Asian markets Meanwhile German enterprises established a management style for European markets The book considers the specificities of the Japanese management model predicated on thorough cost reduction and few product defects In contrast the German management model placed a premium on differentiation based on product quality and functionality with a particular focus on core markets and the skills of the workforce The book posits that corporate expansion was a determining factor in the regionalization of each country Japan underwent a transformation toward Asianization which depended on production and markets in Asia after the 1990s Germany on the other hand consistently pursued Europeanization after the war in two complementary ways 1 a heavy reliance on the European region and 2 the endeavor to advance European integration Transformations in business management are analyzed using the author's two original frameworks 1 The term total system of business management denotes the fundamental conditional structures that regulate and define the established methods of business management within the confines of capitalism in a specific country 2 The term reframing is used to explain the adaptation modification and adjustment of one country's particular management style to another nation These arguments reframe how we understand the historical processes of corporate expansion and provide milestones for a comparative study of management through common factors and characteristics of management

Varieties of capitalism and Mexico, after the economic reforms between 1982 and 2012 Gabriel Alonso

Santana,2024-02-02 This work departs from the literature about Varieties of Capitalism VoC to study Mexico after the economic and political reforms enacted there between 1982 and 2012 which were characterised as neo liberal These were a 180 turn from the previous twelve years when the State invested heavily in corporations and even in oil production and export If such previous economic structure was similar to a state led corporatist but capitalist economy perhaps the new one would similarly follow a specific model The question of the study is after the economic reforms in Mexico between 1982 and 2012 what is the VoC of Mexico This is about the open market international free trade and investment privatisation and other economic reforms that began in Mexico in that period This book also comments on some indicators of economic wellbeing as these reflect the results of the reforms Finally it makes a critical assessment of those changes before attempting to answer the research question

The Making of Global Capitalism Leo Panitch,Sam Gindin,2013-10-08 The all encompassing embrace of world capitalism at the beginning of the twenty first century was generally attributed to the superiority of competitive markets Globalization had appeared to be the natural outcome of this unstoppable process But today with global markets roiling and increasingly reliant on state intervention to stay afloat it has become clear that markets and states are not straightforwardly opposing forces In this groundbreaking work Leo Panitch and Sam Gindin demonstrate the intimate relationship between modern capitalism and the American state The Making of Global Capitalism identifies the centrality of the social conflicts that occur within states rather than between them These emerging fault lines hold out the possibility of new political movements that might transcend global markets

Toward a Critical Theory of States Clyde W. Barrow, 2016-05-12 We have recently lived through the turmoil of a global financial crisis that originated in the United States and despite the platitudes of neo liberal ideology nation states were deeply involved in managing this crisis If the state is again a preeminent actor in the global economy then state theory and the problem of the state should also return to the forefront of political theory Toward a Critical Theory of States is an intensive analysis of the 1970s debate between state theorists Ralph Miliband and Nicos Poulantzas including its wider impact on Marxist theories of the state in subsequent decades Clyde W Barrow makes unique arguments and contributions to this continuing discussion in state theory and lays the foundation for more theoretically informed empirical and historical research on the state in the age of globalization He argues that by merely moving past the Poulantzas Miliband debate as some have recommended scholars have abandoned much that is valuable in understanding the state particularly the need to comprehend the contemporary transformation of the state form and the state apparatuses as part of the new conditions of globalization and transnational capital accumulation Building upon themes of state restructuring found in Poulantzas and Miliband Barrow establishes the outlines of an approach that integrates the thought of both to propose a synthetic understanding of the new imperialism
