Surviving Small Size Regional Integration In Caribbean Ministates:

Surviving Small Size Patsy Lewis, 2002 In 1987 St Vincent's Prime Minister James Mitchell called on his fellow Prime Ministers in the Eastern Caribbean to merge their separate countries into a single state. He argued that individually they had exhausted the possibilities of separate independence and they could only pursue regional and international development and indeed economic survival by pooling their scarce resources to combat common problems. By the end of the year all the Leeward Islands rejected the initiative although it remained very much alive among the governments of the Windward chain Grenada, St Vincent and the Grenadines, St Lucia and the Commonwealth of Dominica. During the next eight years efforts of the Windward Islands to merge were debated but the initiative for unification ultimately died. Through extensive interviews and analyses of primary documents, Lewis paints a compelling picture of island and regional jealousies and conflicting economic priorities which prevented the Windward and Leeward Islands from cooperating and which ultimately destroyed the movement for political unification in the Windwards.

Caribbean Regional Integration Patsy Lewis, 2022-05-29 This book provides an in-depth analysis of the role of regional integration in the contemporary Caribbean, challenging the value of the neoliberal ideology that permeates regionalism discourse. The book asks what value neoliberal regionalism holds for the Caribbean when its economic goals of efficiency and competitiveness serve to actively marginalize small states within the global community. Presenting an alternative framework for assessing success, the book investigates how the Caribbean Community (CARICOM) can confront new challenges and perform a more developmental function, centring economic transformation and a more democratic process. The book also explores long-standing challenges with implementing regional decisions at the national level and the absence of avenues for citizens to influence the direction of the integration movement. It explores these themes against the backdrop of the global pandemic and the climate crisis, which underscore the fragility of Caribbean economies, their high levels of indebtedness, weak social security systems, and their marginality. Bringing together decades of research from one of the world's foremost scholars on the subject, this book will be essential reading for researchers of the Caribbean specifically and for those with an interest in regionalism more generally across the fields of political economy, international relations, history, geography, economics, and global development.

Multidimensional Threats and Regional Responses to Caribbean Security Wendy C. Grenade, 2024-12-20 *Multidimensional Threats and Regional Responses to Caribbean Security* assesses the prevalence and intensity of intersecting security threats such as transnational organized crime, pandemics, and climate change on the state of the Caribbean Community (CARICOM). The interplay of these various threats can adversely affect small island developing states (SIDS). This book aims to expose the fault lines in Western-centric international relations which neglects non-military issues, non-state actors, and other security issues affecting SIDS. This volume also explores the efficacy of security regionalism for SIDS where multiple actors cooperate across different levels and pool sovereignty resources and capabilities within legitimate institutional structures in order to prepare for

prevent and collectively respond to severe security threats This book argues for a more inclusive global IR that considers the realities of the developing world and a reimagining of security regionalism among CARICOM SIDS Regional integration : what in it for CARICOM ? (Working Paper ITD = Documento de Trabajo ITD; 29) Mauricio Mesquita Moreira, Eduardo Mendoza, 2006 Economic and political integration have been a perennial and neuralgic issue in the Caribbean agenda This paper draws on the literature on trade growth and regional agreements to discuss the motivation behind the Caribbean drive for integration the results obtained so far and what is in stock for the future It argues with the help of descriptive statistics an empirical growth model and a gravity model that the traditional trade related gains from regional integration have been and are bound to be limited because of i the countries high openness ii the limited size of the common enlarged market and iii the countries relatively similar factor endowments It also argues though that gains in the area of non tradables due to economies of scale which cannot be mitigated by trade and openness can be substantial Living at the Borderlines Cynthia Barrow-Giles, Don D. Marshall, 2003 The idea that the Caribbean could be devolving downward in wealth function and sovereignty has become a recurrent theme in both academic and popular literature By focusing on some of the current issues facing Caribbean nation states the editors and contributors to this volume hope to inform and contribute to the ongoing debate on the broad themes of Sovereignty and Development and the prospects for survival of Caribbean nation states in a globalised world While some of the papers seek to describe and analyse the range and complexity of the challenge to national sovereignty and public policy autonomy others focus on issues relating to small country size gender and ethnic tensions security constitutional reform and regional integration The result is a balanced perspective the contributors do not gloss over the problem faced by the region At the same time they do not present a hyper pessimistic picture of Caribbean development prospects What gives the collection a particular dynamism is the way in which the authors have challenged the terrain of political possibilities traditionally defined for small peripheral societies **Statehood à la Carte in the Caribbean and the Pacific** Jack Corbett, 2023-04-15 This book explains how leaders in the Caribbean and Pacific regions balance the autonomy viability dilemma of postcolonial statehood that political self determination is a hollow achievement unless it is accompanied by economic development by practising statehood la carte Previous research has focused on the pursuit of decolonial self determination through and above the nation state via regionalism and internationalism or by creating non sovereign alternatives to it This book looks at how communities have sought the same goals below the state including via secession and devolution Downsizing is typically portrayed as the antithesis of progressive cosmopolitan internationalism and employed as evidence for the claim that the age of anticolonial self determination has ended In this book Jack Corbett shows how these movements are animated by similar ideas and motivations that are rendered viable by the simultaneous pursuit of regional integration and forms of non sovereignty He argues that the la carte pursuit of political and economic independence through above and below the state and via non sovereign alternatives to it is a pragmatic response to the contradictions inherent to

coloniality **Handbook on the Politics of Small States** Godfrey Baldacchino, Anders Wivel, 2020-03-28 Comprehensive and timely this Handbook identifies the key characteristics challenges and opportunities involved in the politics of small states across the globe today Acknowledging the historical legacies behind these states the chapters unpack the costs and benefits of different political models for small states The Politics of Regional Integration in Latin America O.
