Romanow Papers: The governance of health care in Canada Commission on the Future of Health Care in Canada, 2004-01-01 The twelve papers in this third volume of the research program for the Romanow Commission offer a detailed analysis of the governance of health care in Canada from the perspective of constitutionalism intergovernmental relations and societal context In the first section the authors deal with the formal division of powers regarding health care as outlined in the Canadian constitution and the Charter of Rights and Freedoms The second section outlines the strengths and weaknesses of the intergovernmental governance of health care Finally the third section focuses on governance of health care outside of the governmental sphere The theme that resonates throughout the contributions and which is in itself a call for deeper analysis is that health care governance has become locked in a cycle of mutual recrimination blame assigning and blame avoidance from the federal and provincial levels right down to the level of the individual citizen

Managing a Canadian Healthcare Strategy A. Scott Carson, 2016-10-20 Canada's fragmented healthcare system is one of the most expensive among the OECD countries yet the quality of its performance is mediocre at best Canada lacks a system wide healthcare strategy that brings together many individual federal provincial and territorial strategies into a comprehensive and coherent whole Managing a Canadian Healthcare Strategy is a collection of ten policy research essays by leading Canadian and international scholars who address three important questions First if Canada had a unifying strategy how would the country measure its success and monitor its performance Second who are the agents of change to bring about a Canadian system wide strategy Third how can the

Scott Carson, Jeffrey Dixon, Kim Richard

Nossal, 2015-05-01 While Canadians are proud of their healthcare system the reality is that it is fragmented and disorganized. Instead of a pan Canadian system it is a system of systems: thirteen provincial and territorial systems and a federal system. As a result Canadian healthcare has not only become one of the costliest in the world but is falling well behind many developed countries in terms of quality. Canadians increasingly realize that their healthcare system is no longer fiscally sustainable yet change remains elusive. The standard claim is that Canada's multijurisdictional approach makes system wide reform nearly impossible. *Toward a Healthcare Strategy for Canadians* disputes this reasoning making the case for a comprehensive system wide made in Canada healthcare strategy. It looks at the mechanics of change and suggests ways in which the various participants in the system: governments, healthcare professionals, the private sector and patients can work collaboratively to transform a second rate system. Addressing critical issues of health, human resources, electronic health records, integrated care and pharmacare. *Toward a Healthcare Strategy for Canadians* shows how a system wide strategic approach to this crucial policy area can make a difference in Canada's healthcare system in the future.

Health and Canadian Society

David Coburn, Carl D'Arcy, George Murray Torrance, 1998-01-01 *Health and Canadian Society* provides a comprehensive overview of the relationship between health, health care and Canadian society. It is a wide ranging volume that moves from personal and micro concerns to a more macro and institutional focus. It includes chapters of a descriptive nature and others with a more explanatory intent. They have been selected from the major journals or have been expressly written for this book. Ninety five percent of the contributions are new to this edition. The chapters and the studies reported on are methodologically diverse ranging from ethnographic studies to statistical analyses of data from large national surveys. Though the chapters are written by anthropologists, economists, historians, political scientists and physicians as well as sociologists they all have a sociological turn. Recognized as the standard textbook on the sociology of health in Canada, *Health and Canadian Society* is an essential reference for sociologists, health care providers, health administrators and policy planners.

Canadian Social Policy, Fifth Edition Anne Westhues, Brian Wharf, 2012-05-25 Social policy shapes the daily lives of every Canadian citizen and should reflect the beliefs of a majority of Canadians on just approaches to the promotion of health, safety and well being. Too often those on the front lines: social workers, nurses and teachers observe that policies do not work well for the most vulnerable groups in society. In the first part of this new edition of *Canadian Social Policy* Westhues and Wharf argue that service deliverers have discretion in how policies are implemented and the exercise of this discretion is how citizens experience policy, whether or not it is fair and reasonable. They show the reader how social policy is made and they encourage active citizenship to produce policies that are more socially just. New material includes an examination of the reproduction of systemic racism through the implementation of human rights policy and a comparative analysis of the policy making process in Quebec and English Canada. The second part of the book discusses policy issues currently under debate in Canada. Included are new chapters that explore parental leave policies and housing as a

determinant of health All chapters contain newly updated statistical data and research and policy analysis A reworked section on the process of policy making and the addition of questions for critical reflection enhance the suitability of the book as a core resource in social policy courses The final chapter explores how front line workers in the human services can advocate for change in organizational policies that will benefit the people supported
