Sustainable Urban Landscapes The Surrey Charette:

Sustainable Urban Landscapes University of British Columbia. James Taylor Chair in Landscape and Liveable Environments, 1996 This book is about how to make our new neighbourhoods more sustainable than they are now By sustainable we mean the maintenance of the ecological health of our neighbourhoods and the provision of equitable access to affordable housing for our children We hope that this book will be of interest to everyone from the public officials and private developers who participate in developing and managing the urban landscape today to the secondary school students who will shoulder these responsibilities tomorrow This book includes four different designs for the same 400 acre site in Surrey British Columbia each design having been produced by a team of architects and landscape architects working en charrette

Design Charettes for Sustainable Communities Patrick M. Condon, 2012-09-26 A step by step guide to more synthetic holistic and integrated urban design strategies Design Charettes for Sustainable Communities is a practical manual to accomplish complex community design decisions and create more green clean and equitable communities The design charrette has become an increasingly popular way to engage the public and stakeholders in public planning and Design Charettes for Sustainable Communities shows how citizens and officials can use this tool to change the way they make decisions especially when addressing issues of the sustainable community Designed to build consensus and cooperation a successful charrette produces a design that expresses the values and vision of the community Patrick Condon outlines the key features of the charrette an inclusive decision making process that brings together citizens designers public officials and developers in several days of collaborative workshops Drawing on years of experience designing sustainable urban environments and bringing together communities for charrettes Condon s manual provides step by step instructions for making this process work to everyone s benefit He translates emerging sustainable development concepts and problem solving theory into concrete principles in order to explain what a charrette is how to organize one and how to make it work to produce sustainable urban design results *Water Centric Sustainable Communities* Vladimir Novotny, Jack Ahern, Paul Brown, 2010-09-23 The current literature compartmentalizes the complex issue of water and wastewater into its discrete components technology planning policy construction economics etc Considered from the perspective of sustainability however water in the urban environment must be approached as a single resource that can be continuously reused and recycled This book will be the first to capture all of the current work on this idea in a single integrated plan for designing the water centric cities of the future From new construction to the retrofitting of existing systems this book presents the case for a new urban relationship to water one with a more sustainable connection to the environment and the hydrological cycle Through case studies of successfully planned and built systems around the world the book will educate the reader about the need for a new approach to urban water management and make the case that these changes are not only possible but imperative Environmentalism in Landscape Architecture Michel Conan, 2000 The papers presented in this volume range

from proposals for new design approaches historical analysis of the relationship between the practice of landscape architecture and environmentalism to the theories of early practitioners of landscape architecture imbued by an environmentalist outlook The issues above are addressed through topics as eclectic as the design of American zoos the establishment of the Tennessee Valley Authority road design and maintenance in Texas and criticism of relationships between the words and works of select landscape architects This volume provides a fresh approach to encounters between environmentalism and landscape architecture by reframing the issues through self reflection instead of strategic debate

Dynamic Urban Design Michael A. Von Hausen, 2013 For future human survival and quality of life the world needs a more inclusive rigorous socially inspired and comprehensive urban design model integrated with sustainable development This book delivers that model Back cover

Leadership for Environmental Sustainability Benjamin W. Redekop, 2010-07-02 As the first book in the field of leadership studies to approach sustainability as a multi faceted leadership challenge Leadership for Environmental Sustainability will help to set the terms of the discussion on this topic among students scholars and practitioners of leadership for years to come It explores the connection between leadership and sustainability from a variety of disciplinary perspectives including sociology history psychology business literature communication and the arts With short chapters edited for readability the book is aimed at scholars practitioners students and educated lay readers interested in cutting edge research and thinking on this topic

Community Livability Fritz Wagner, Roger W. Caves, 2012-06-25 What is a livable community How do you design and develop one What does government at all levels need to do to support and nurture the cause of livable communities Using a blend of theory and practice experts in the field look at evidence from international state and local perspectives to explore what is meant by the term livable communities Chapters examine the various influencing factors such as the effect and importance of transportation options alternatives to the elderly the significance of walkability as a factor in developing a livable and healthy community the importance of good open space providing for human activity and health restorative benefits the importance of coordinated land use and transportation planning and the relationship between livability and quality of life While much of the discussion of this topic is usually theoretical and abstract Wagner and Caves use case studies from North America Brazil and the United Kingdom to provide substantive examples of initiatives implemented across the world This book fills an important gap in the literature on livable communities and at the same time assists policy officials professionals and academics in their quest to develop livable communities

The Living Landscape, Second Edition Frederick R. Steiner, 2012-09-26 The Living Landscape is a manifesto resource and textbook for architects landscape architects environmental planners students and others involved in creating human communities Since its first edition published in 1990 it has taught its readers how to develop new built environments while conserving natural resources No other book presents such a comprehensive approach to planning that is rooted in ecology and design And no other book offers a similar step by step method for planning with an

emphasis on sustainable development This second edition of The Living Landscape offers Frederick Steiner's design oriented ecological methods to a new generation of students and professionals The Living Landscape offers a systematic highly practical approach to landscape planning that maximizes ecological objectives community service and citizen participation more than 20 challenging case studies that demonstrate how problems were met and overcome from rural America to large cities scores of checklists and step by step guides hands on help with practical zoning land use and regulatory issues coverage of major advances in GIS technology and global sustainability standards more than 150 illustrations As Steiner emphasizes throughout this book all of us have a responsibility to the Earth and to our fellow residents on this planet to plan with vision We are merely visiting this planet he notes we should leave good impressions Ecology, Community and Delight Ian Thompson, 2003-09-02 This book examines the three principal value systems which influence landscape architectural practice the aesthetic the social and the environmental and seeks to discover the role that the profession should be playing now and for the future The book integrates an investigation of historical sources with contemporary research into the beliefs and values of practitioners The book raises questions such as should landscape architecture aspire to the status of an art form What is the relationship between aesthetics and ecology Does landscape architecture have a social mission
