Svec 2000 6 The Map Trade In The Late Eighteenth Century:

The Eighteenth Century American Society for Eighteenth-Century Studies, 2004 In their hundreds of entries and reviews the editorial staff have expanded both the quantity and depth of the work but also re-evaluated the subject headings to better reflect the needs of users be they professionals or students General categories include printing and bibliographical studies historical social and economic studies philosophy *Print Quarterly*, 2005 The Language of Mineralogy Matthew D. Eddy, 2016-12-05 Classification is an important part of science yet the specific methods used to construct Enlightenment systems of natural history have proven to be the *black box* of studies of eighteenth century culture One reason that systematic classification has received so little attention is that natural history was an extremely diverse subject which appealed to a wide range of practitioners including wealthy patrons professionals and educators In order to show how the classification practices of a defined institutional setting enabled naturalists to create systems of natural history this book focuses on developments at Edinburgh's medical school one of Europe's leading medical programs In particular it concentrates on one of Scotland's most influential Enlightenment naturalists Rev Dr John Walker the professor of natural history at the school from 1779 to 1803 Walker was a traveller cleric author and advisor to extremely powerful aristocratic and government patrons as well as teacher to hundreds of students some of whom would go on to become influential industrialists scientists physicians and politicians This book explains how Walker used his networks of patrons and early training in chemistry to become an eighteenth century naturalist Walker's mineralogy was based firmly in chemistry an approach common in Edinburgh's medical school but a connection that has been generally overlooked in the history of British geology By explicitly connecting eighteenth century geology to the chemistry being taught in medical settings this book offers a dynamic new interpretation of the nascent earth sciences as they were practiced in Enlightenment Britain Because of Walker's influence on his many students the book also provides a unique insight into how many of Britain's leading Regency and Victorian intellectuals were taught to think about the composition and structure of the material world Une carrière de géographe au siècle des Lumières Lucile Haguët, Catherine Hofmann, 2018 Vritable Strabon français pour ses contemporains Jean Baptiste d'Anville est considéré comme l'un des plus grands géographes des Lumières Ce livre fruit du travail d'analyse d'une dizaine de spécialistes internationaux fondé sur des sources nombreuses et souvent inédites est la première monographie lui être consacrée Comment cet inconnu fils de tailleur parisien se retrouve-t-il vingt-deux ans géographe du roi et précepteur du jeune Louis XV C'est ce parcours extraordinaire que retracent les auteurs de cet ouvrage en reconstituant le réseau qu'il a su créer tout en s'assurant la protection des ducs d'Orléans sur trois générations et l'intégrité de la couronne portugaise Au fil des chapitres se révèle l'impressionnante habileté intellectuelle de d'Anville capable de satisfaire les exigences de ses mécènes sans trahir ses sources conservant son intégrité de savant malgré la pression des enjeux diplomatiques Sans quitter son cabinet parisien par le seul exercice d'une critique aiguisée et d'un croisement systématique des sources textes anciens cités de
