Sway Of The Grand Saloon A Social Histor:

The Sway of the Grand Saloon John Malcolm Brinnin, 2000 **The Sway of the Grand Saloon** John Malcolm Brinnin, 1971 History of Transatlantic passenger travel **A History of Modern Tourism** Eric Zuelow, 2015-10-26 Tourism is one of the largest industries in the world yet leisure travel is more than just economically important It plays a vital role in defining who we are by helping to place us in space and time In so doing it has aesthetic medical political cultural and social implications However it hasn't always been so Tourism as we know it is a surprisingly modern thing both a product of modernity and a force helping to shape it A History of Modern Tourism is the first book to track the origins and evolution of this pursuit from earliest times to the present From a new understanding of aesthetics to scientific change from the invention of steam power to the creation of aircraft from an elite form of education to family car trips to see national shrines this book offers a sweeping and engaging overview of a fascinating story not yet widely known *F. Scott Fitzgerald in Context* Bryant Mangum, 2013-03-18 The fiction of F Scott Fitzgerald serves as a compelling and incisive chronicle of the Jazz Age and Depression Era This collection explores the degree to which Fitzgerald was in tune with and keenly observant of the social historical and cultural contexts of the 1920s and 1930s Original essays from forty international scholars survey a wide range of critical and biographical scholarship published on Fitzgerald examining how it has evolved in relation to critical and cultural trends The essays also reveal the micro contexts that have particular relevance for Fitzgerald's work from the literary traditions of naturalism realism and high modernism to the emergence of youth culture and prohibition early twentieth century fashion architecture and design and Hollywood underscoring the full extent to which Fitzgerald internalized the world around him *Engines of Empire* Douglas R. Burgess Jr., 2016-05-04 In 1859 the S S Great Eastern departed from England on her maiden voyage She was a remarkable wonder of the nineteenth century an iron city longer than Trafalgar Square taller than Big Ben's tower heavier than Westminster Cathedral Her paddles were the size of Ferris wheels her decks could hold four thousand passengers bound for America or ten thousand troops bound for the Raj Yet she ended her days as a floating carnival before being unceremoniously dismantled in 1889 Steamships like the Great Eastern occupied a singular place in the Victorian mind Crossing oceans ferrying tourists and troops alike they became emblems of nationalism modernity and humankind's triumph over the cruel elements Throughout the nineteenth century the spectacle of a ship's launch was one of the most recognizable symbols of British social and technological progress Yet this celebration of the power of the empire masked overconfidence and an almost religious veneration of technology Equating steam with civilization had catastrophic consequences for subjugated peoples around the world Engines of Empire tells the story of the complex relationship between Victorians and their wondrous steamships following famous travelers like Mark Twain Charles Dickens and Jules Verne as well as ordinary spectators tourists and imperial administrators as they crossed oceans bound for the colonies Rich with anecdotes and wry humor it is a fascinating glimpse into a world where an empire felt powerful and

anything seemed possible if there was an engine behind it

The Ship of Dreams Gareth Russell,2019-11-19 Gareth Russell has chosen a handful of passengers on the doomed liner and by training a spotlight on every detail of their lives he has given us a meticulous sensitive and at times harsh picture of the early 20th century in Britain and America A marvelous piece of work Julian Fellowes creator of Downton Abbey A riveting account of the Titanic disaster and the unraveling of the gilded Edwardian society that had created it In April 1912 six notable people were among those privileged to experience the height of luxury first class passage on the ship of dreams the RMS Titanic Lucy Leslie Countess of Rothes son of the British Empire Tommy Andrews American captain of industry John Thayer and his son Jack Jewish American immigrant Ida Straus and American model and movie star Dorothy Gibson Within a week of setting sail they were all caught up in the horrifying disaster of the Titanic s sinking one of the biggest news stories of the century Today we can see their stories and the Titanic s voyage as the beginning of the end of the established hierarchy of the Edwardian era Writing in his elegant signature prose and using previously unpublished sources deck plans journal entries and surviving artifacts Gareth Russell peers through the portholes of these first class travelers to immerse us in a time of unprecedented change in British and American history Through their intertwining lives he examines social technological political and economic forces such as the nuances of the British class system the explosion of competition in the shipping trade the birth of the movie industry the Irish Home Rule Crisis and the Jewish American immigrant experience while also recounting their intimate stories of bravery tragedy and selflessness Masterful in its superb grasp of the forces of history gripping in its moment by moment account of the sinking revelatory in discounting long held myths and lavishly illustrated with color and black and white photographs this absorbing accessible and authoritative account of the Titanic s life and death is destined to become the definitive book on the subject

Colonel House Charles E. Neu,2014-12-31 Charles E Neu details the life of

Colonel House a Texas landowner who rose to become one of the century's greatest political operators **Sailor in the White House** Robert Cross, 2014-01-15 This behind the scenes look at Franklin D Roosevelt's extraordinary skill as a blue water sailor explores how FDR's love of the sea shaped his approach to public service and even influenced the course of events in World War II Family and friends Secret Service agents and others reveal never before told stories of their days afloat with America's greatest seafaring president including how he escaped injury when fire broke out aboard his small schooner how ships were modified to accommodate his disability and details of his wartime ocean rendezvous with Winston Churchill Sailing pals discuss his abilities as a skipper along with his enjoyment of an evening cocktail at sea during the days of Prohibition Letters and other documents illustrate how the sea was never far from Roosevelt's thoughts Robert Cross examines Roosevelt's great affection for the sea in the context of an era dominated by the Great Depression and two world wars While some criticized Roosevelt for taking too many seagoing trips he logged hundreds of thousands of miles at sea and was sometimes out of touch with the White House and the Secret Service for hours FDR was quick to explain that his lengthy voyages allowed him to personally assess the world situation instead of relying solely upon White House briefing books The author argues that the skills required to be a good sailor have much in common with those needed to be a successful politician the ability to alter courses make compromises and shift positions as the situation warrants Cross describes FDR as a master at dealing with the unexpected allowing him to excel in the Navy Department the governor's mansion and the White House as well as the open sea From luxury ocean liners and presidential yachts to submarines and kayaks this book lists all of the vessels on which FDR sailed and includes some never before published photographs *Vast Expanses* Helen M. Rozwadowski, 2018-10-15 Much of human experience can be distilled to saltwater tears sweat and an enduring connection to the sea In *Vast Expanses* Helen M Rozwadowski weaves a cultural environmental and geopolitical history of that relationship a journey of tides and titanic forces reaching around the globe and across geological and evolutionary time Our ancient connections with the sea have developed and multiplied through industrialization and globalization a trajectory that runs counter to Western depictions of the ocean as a place remote from and immune to human influence Rozwadowski argues that knowledge about the oceans created through work and play scientific investigation and also through human ambitions for profiting from the sea has played a central role in defining our relationship with this vast trackless and opaque place It has helped us to exploit marine resources control ocean space extend imperial or national power and attempt to refashion the sea into a more tractable arena for human activity But while deepening knowledge of the ocean has animated and strengthened connections between people and the world's seas to understand this history we must address questions of how by whom and why knowledge of the ocean was created and used and how we create and use this knowledge today Only then can we can forge a healthier relationship with our future sea
