Robert Fitzgerald, Chris Rowley

The Multinational Paradigm:

The Multinational Paradigm Robert Z. Aliber, 2003 Understanding the impact of economic growth rates of countries on individual firms Multinational Enterprise and Economic Analysis Richard E. Caves, 2007-07-23 The third edition of *Multinational Enterprise and Economic Analysis* surveys the contributions that economic analysis has made to our understanding of why multinational enterprises exist and what consequences they have for the workings of the national and international economies It shows how economic analysis can explain multinationals activity patterns and how economics can shed conceptual light on problems of business policies and managerial decisions arising in practice It addresses the welfare problems arising from multinationals activities and the logic of governments preferences and choices in their dealings with multinationals Suitable for researchers graduates and upper level undergraduates The third edition of this highly accessible book incorporates the many additions to our knowledge of multinationals accumulated in research appearing in the past decade *The multinational paradigm* Nick Mayhew, 1990 *The Multinational Enterprise and the Emergence of the Global Factory* Peter J. Buckley, 2014-11-04 The *Multinational Enterprise and the Emergence of the Global Factory* brings together research papers authored by Peter J Buckley focusing on three of the most important empirical and theoretical issues in the global economy the rise of the global factory the growth of FDI from emerging economies recent developments in the theory of IB The Eclectic Paradigm John Cantwell, 2016-04-29 To help to promote a greater conversation between those interested in the theoretical explanation of IB activities from various different backgrounds or starting points this book offers a special Collection of JIBS articles which concern the foundations and the application of the eclectic paradigm

New Challenges for International Business Research John H. Dunning, 2010-01-01 In this final collection of his essays John Dunning looks back on more than 40 years of research in International Business IB whilst at the same time considering possibilities for the future International Business and the Eclectic Paradigm John Cantwell, Rajneesh Narula, 2003-07-24 The eclectic paradigm has arguably become the dominant theoretical basis in the study of FDI multinational corporations and internationalisation over the last two decades The contributions to this volume evaluate the eclectic paradigm in the global economy and its validity as a theoretical basis to understand developments such as economic globali *Regional and Global Multinationals* Christoph Czychon, 2021-06-29 Based on their ability to facilitate interdependencies across the borders of national and regional markets multinationals enterprises MNEs act as the key drivers of world trade and investment activities While recent global challenges additionally highlight the need to explain and assess the status and progress of internationality regionality previous research renders the concept of firm level globalization as a special but not the general case Christoph Czychon dedicates specific attention to the research on regional and global MNEs based on an extensive and rigorous review of the existing academic literature as well as the analysis of 2005 2015 empirical data from the European context with a focus on CAC40 and DAX30 listed firms In doing so the author offers

insights and results that stand in contrast to the original narrative of the debate and presents a comprehensive and updated perspective on regional and global MNEs

Multinational Companies from Japan Robert Fitzgerald,Chris Rowley,2017-10-02 Since the bursting of Japan's bubble economy from 1990 onwards its multinational companies MNCs have faced new competitive challenges and questions about the management practices on which they had built their initial success in global markets Japanese engagement in the international economy has undergone a number of phases Historically Japanese MNCs learnt from foreign companies frequently through strategic alliances After the post war economic miracle Japanese manufacturers in particular converted themselves into MNCs transferred their home grown capabilities to overseas subsidiaries and made an impact on the world economy But the period after 1990 marked declining Japanese competitiveness and asked questions about the ability of Japanese MNCs to be more responsive and global in their strategies organization and capabilities It has been argued that the established management practices of Japanese MNCs inhibited adaptation to recent demands of global competition This volume presents new case evidence on how Japanese MNCs have responded to the new challenges of the global market place and it provides examples of how they have transformed strategies and competitive capabilities This book was originally published as a special issue of Asia Pacific Business Review

Acquisitions by Emerging Multinational Corporations Johannes Distler,2017-07-27 This thesis analyzes the motivation and performance of 403 acquisitions made by emerging multinational corporations EMNCs in Western Europe and North America between 1994 and 2013 The findings indicate that most EMNCs were motivated to acquire in order to obtain access to the upstream and downstream know how of their target firms In addition the thesis event study results demonstrate that EMNCs on average generated value for their shareholders with their acquisitions over short periods around acquisition announcement This result is particularly significant since similar studies on buying firms from developed markets have frequently come to the conclusion that acquirers destroy shareholder value
