The Mystery of the Last Supper Modern biblical scholars tend to dismiss the Christmas story of the wise men from the East

as pious legend Matthew's gospel offers few details but imaginative Christians filled out the story early on giving us the three

kings guided by a magical star who join the adoring shepherds in every Christmas carol For many scholars then there is no

reason to take the gospel story seriously But are they right Are the wise men no more than a poetic fancy In an astonishing

feat of detective work Dwight Longenecker makes a powerful case that the visit of the Magi to Bethlehem really happened

Piecing together the evidence from biblical studies history archeology and astronomy he goes further uncovering where they

came from why they came and what might have happened to them after eluding the murderous King Herod In the process he

provides a new and fascinating view of the time and place in which Jesus Christ chose to enter the world The evidence is

clear and compelling The mysterious Magi from the East were in all likelihood astrologers and counselors from the court of

the Nabatean king at Petra where the Hebrew messianic prophecies were well known The star that inspired their journey

was a particular planetary alignment confirmed by computer models that in the astrological lore of the time portended the

birth of a Jewish king The visitors whose arrival troubled Herod and all Jerusalem with him may not have been the turbaned

oriental kings of the Christmas carol but they were real and by demonstrating that the wise men were no fairy tale Mystery

of the Magi demands a new level of respect for the historical claims of the gospel
