**Aphrodite's Tortoise** Lloyd Llewellyn-Jones, 2003-12-31 Greek women routinely wore the veil That is the unexpected finding of this meticulous study one with interesting implications for the origins of Western civilisation The Greeks popularly and rightly credited with the invention of civic openness are revealed as also part of a more Eastern tradition of seclusion Llewellyn Jones work proceeds from literary and notably from iconographic evidence In sculpture and vase painting it demonstrates the presence of the veil often covering the head but also more unobtrusively folded back onto the shoulders This discreet fashion not only gave a privileged view of the face to the ancient art consumer but also incidentally allowed the veil to escape the notice of traditional modern scholarship From Greek literary sources the author shows that full veiling of the head and face was commonplace He analyses the elaborate Greek vocabulary for veiling and explores what the veil meant to achieve He shows that the veil was a conscious extension of the house and was often referred to as tegidion literally a little roof Veiling was thus an ingenuous compromise it allowed women to circulate in public while maintaining the ideal of a house bound existence Alert to the different types of veil used the author uses Greek and more modern evidence mostly from the Arab world to show how women could exploit and subvert the veil as a means of eloquent sometimes emotional communication First published in 2003 and reissued as a paperback in 2010 Llewellyn Jones book has established itself as a central and inspiring text for the study of ancient women
