The Multidimensionality of Regions in World Politics Paul J. Kohlenberg, Nadine Godehardt, 2020-09-02 This book examines what counts regarding the role and conceptualization of regions in world politics It presents a fresh look at which narratives awake persist fall dormant or re emerge amidst diverse interlocking processes of environmental technological and global political changes It puts forward a thorough and multidimensional conceptualization of regions as embedded in changing overlapping environments and requires more attention to regions shifting materiality temporality and technological underpinnings

Combining the approaches questions and analyses of Critical IR and Political Geography it calls for a renewed emphasis on the puzzle of how the contextual environment of regions may become more or less multidimensional or how some aspects of a region s contextual environment may be mutually constitutive in non intuitive ways Ultimately it sheds light on the politics of regions and the regional scale in international politics in order to overcome the often underlying territorial fixity of territory

and space within IR approaches This book will be of key interest to scholars and students of international relations international political sociology political geography regionalism geopolitics and area studies **Tribes and State Formation in the Middle East** Philip Shukry Khoury, Joseph Kostiner, 1990 Offering a fuller understanding of the complexities and particular patterns of state formation in regions where tribes have exercised a significant influence this volume focuses on the continuing existence of tribal structures and systems in contemporary times within contemporary nation states The contributors offer hypotheses as to why these groups have managed to survive and what impact they have had on modern states backcover Knowledge Production, Area Studies and Global Cooperation Claudia Derichs, 2017-04-27 Whereas Area Studies and cross border cooperation research conventionally demarcates groups of people by geographical boundaries individuals might in fact feel more connected by shared values and principles than by conventional spatial dimensions Knowledge Production Area Studies and Global Cooperation asks what norms and principles lead to the creation of knowledge about cross border cooperation and connection It studies why theories methods and concepts originate in one place rather than another how they travel and what position the scholar adopts while doing research particularly in the field Taking case studies from Asia the Middle East and North Africa the book links the production of alternative epistemologies to the notion of global cooperation and reassesses the ways in which the concept of connectedness can be applied at the translocal and individual rather than the formal international and collective level Knowledge Production Area Studies and Global Cooperation provides an innovative and critical approach towards established means of producing knowledge about different areas of the world demonstrating that an understanding of pluri local connectivity should be integrated into the production of knowledge about different areas of the world and the behavioural dimension of global cooperation By shifting the view from the collective to the individual and from the formal to often invisible patterns of connectedness this book provides an important fresh perspective which will be of interest to scholars and students of Area Studies Politics International Relations and Development Studies Middle East Studies for the New Millennium Seteney Khalid Shami, Cynthia Miller-Idriss, 2016-11-15 Afterword Middle East Studies for the New Millennium Infrastructures of Knowledge Appendix Producing Knowledge on World Regions Overview of Data Collection and Project Methodology 2000 Present About the Contributors Index
