The Minke Connection:

Antarctica in International Law Ben Saul, Tim Stephens, 2015-04-30 Antarctica one of the world's last great wildernesses presents special challenges for international law. Fears that Antarctica would become a front in the Cold War catalysed agreement on the 1959 Antarctic Treaty which neither legitimised nor challenged the existing sovereign claims to the continent. The unique Antarctic Treaty System has provided the foundation for peaceful, harmonious and effective governance. There are however new anxieties about the frozen continent and the Southern Ocean. Antarctica already feels the effects of climate change and ocean acidification. Claimant states assert rights to the Antarctic continental shelf and interest in Antarctic resources grows. Tourism brings new environmental and safety risks. China and other powers are increasing their activities with some questioning the consensus of the Antarctic Club. Security concerns are increasingly discussed despite Antarctica's dedication to peaceful purposes. This book brings together the main primary international materials concerning the regulation and governance of Antarctica including multilateral and bilateral treaties, United Nations materials, soft laws and judicial decisions. It covers the spectrum of Antarctic issues from environmental protection to scientific cooperation to tourism. As it shows, Antarctic law has constantly adapted to meet new challenges and is a sophisticated, inclusive, dynamic and responsive regime.

A Young Wife Pam Lewis, 2012-06-19 In this sweeping saga of love, betrayal and redemption, a young Dutch woman's search for family takes her across three continents.

Making Meaning by Making Connections Kathy L. Schuh, 2016-10-20 This book documents those first links that students make between content they learn in their classrooms and their prior experiences. Through six late elementary school case studies, these knowledge construction links are brought to life. The links of the students are often rich in describing who these individuals are, where they are in their learning process and what is meaningful to them. Many times these links point to what has been learned both in and out of school and the contexts when and where that learning took place. The mind as rhizome metaphor was used to guide the development and interpretation of the studies while the lens of Peircian semiotics provides an interpretation for these initial links. The resulting grounded theory is presented through a rich and extensive presentation of excerpts from classroom observations, student interviews and a student writing activity and describes the varying types of student links, how the links were prompted, the relationships between what the students were learning and what they already knew and specific types of in-school links. The narrative includes how these links were supported or inhibited in the classroom, drawing on the roles of the teachers in the classrooms and what constituted authority sources of information in those classrooms. Before exploring the students' linking as a process of ongoing semiosis and how this process is part of a dynamic system, a study of the relationship between student knowledge links and achievement is shared. This rich narrative will be of interest to scholars and practitioners alike and includes an extensive appendix documenting the research methods.

Morphology of the Auditory and Vestibular Organs in Mammals, with Emphasis on Marine Species Galina Solntseva, 2007-07-03 This monograph

describes the directions of the structural evolution of the peripheral part of the auditory system in representatives of different ecological groups of mammals. Special attention is paid to the least studied orders of marine mammals: pinnipeds and cetaceans, being of great interest both with regards to the echolocating abilities in dolphins and the influence of the aquatic environment on the development of morphological adaptations in the structure of the outer middle and inner ears. Undertaken for the first time, a comparative embryological study of the peripheral part of the auditory system in marine mammals allowed the author to reveal the developmental pattern of the auditory and equilibrium organs in animals with a different auditory specialization. The influence of ecological factors on the adaptive trait development in the structural organization of the outer middle and inner ears in semi-aquatic and aquatic species is discussed. The book is illustrated with a large number of high quality micro photos.

Literature Suppressed on Political Grounds, Fourth Edition Nicholas Karolides, 2019-08-01 Throughout history tyrants, totalitarian states, church institutions and democratic governments alike have banned books that challenged their assumptions or questioned their activities. Political suppression also occurs in the name of security and the safeguarding of official secrets and is often used as a weapon in larger cultural or political battles. *Literature Suppressed on Political Grounds, Fourth Edition* illustrates the extent and frequency of such censorship in nearly every form of writing. Entries include *Animal Farm* George Orwell, *The Appointment* Herta and Paul Amirian, *Born on the Fourth of July* Ron Kovic, *Burger's Daughter* Nadine Gordimer, *Cancer Ward* Aleksandr Solzhenitsyn, *Doctor Zhivago* Boris Pasternak, *The Fugitive* Pramoedya Ananta Toer, *Girls of Riyadh* Rajaa Alsanea, *The Grapes of Wrath* John Steinbeck, *Gulliver's Travels* Jonathan Swift, *The Hate U Give* Angie Thomas, *The Jungle* Upton Sinclair, *Kiss of the Spider Woman* Manuel Puig, *Manifesto of the Communist Party* Karl Marx and Friedrich Engels, *Les Misérables* Victor Hugo, *Mein Kampf* Adolf Hitler, *Slaughterhouse-Five* Kurt Vonnegut Jr., *Snow* Orhan Pamuk, *The Struggle Is My Life* Nelson Mandela, *The Things They Carried* Tim O'Brien, *The Van* Karel van het Reve, *Plays* Václav Havel and more.

Connections: The Geometric Bridge Between Art & Science (2nd Edition) Jay Kappraff, 2001-11-28 The first edition of *Connections* was chosen by the National Association of Publishers USA as the best book in Mathematics, Chemistry and Astronomy Professional and Reference in 1991. It has been a comprehensive reference in design science, bringing together in a single volume material from the areas of proportion in architecture and design, tilings and patterns, polyhedra and symmetry. The book presents both theory and practice and has more than 750 illustrations. It is suitable for research in a variety of fields and as an aid to teaching a course in the mathematics of design. It has been influential in stimulating the burgeoning interest in the relationship between mathematics and design. In the second edition, there are five new sections, supplementary as well as a new preface describing the advances in design science since the publication of the first edition.

International Environmental Law Fitzmaurice, Malgosia, Wong, Meagan S., Crampin, Joseph, 2022-04-22 This textbook provides a compelling and structured introduction to international environmental law in the Text Cases and Materials genre.
