The Missing Planets:

The Lost Planets John Wenz, 2019-10-08 A fascinating account of the pioneering astronomer who claimed erroneously to have discovered a planet outside the solar system There are innumerable planets revolving around innumerable stars across our galaxy Between 2009 and 2018 NASA's Kepler space telescope discovered thousands of them But exoplanets planets outside the solar system appeared in science fiction before they appeared in telescopes Astronomers in the early decades of the twentieth century spent entire careers searching for planets in other stellar systems In *The Lost Planets* John Wenz offers an account of the pioneering astronomer Peter van de Kamp who was one of the first to claim discovery of exoplanets Van de Kamp working at Swarthmore College's observatory announced in 1963 that he had identified a planet around Barnard's Star the second closest star system to the Sun He cited the deviations in Barnard's star's path wobbles that suggested a large object was lurching around the star Van de Kamp became something of a celebrity appearing on a television show with Mr Wizard Don Henry but subsequent research did not support his claims Wenz describes van de Kamp's stubborn refusal to accept that he was wrong discusses the evidence found by other researchers and explains recent advances in exoplanet detection including transit radial velocity direct imaging and microlensing Van de Kamp retired from Swarthmore in 1972 and died in 1995 at 93 In 2009 Swarthmore named its new observatory the Peter van de Kamp Observatory In the 1990s astronomers discovered and confirmed the first planet outside our solar system In 2018 an exoplanet was detected around Barnard's Star not however the one van de Kamp thought he had discovered in 1963

[Dark Matter, Missing Planets and New Comets](#) Tom Van Flandern, 1999-01-08 Tom Van Flandern's book adds a new dimension to cosmology not only does it present a novel approach to timeless issues it stands up to the closest scientific scrutiny Even the most respected scientists today will readily admit that the Big Bang Theory is full of holes But it takes a new look like *Dark Matter Missing Planets and New Comets* to explain not only why the theory is wrong but what to substitute in its place If you are curious about such things as the nature of matter and the origin of the solar system but feel inadequately equipped to grasp what modern science has to say about such things read this book You will not get the all too common condescending attempt to water down the mysteries of modern science into a form intelligible to little non scientist you but rather a straightforward new theory logically derived in front of your eyes which challenges the roots of many of today's complex accepted paradigms yet whose essence is simple enough to be thoroughly communicated to the intelligent layman without losing it in the translation

The Missing Planets Richard Trigaux, 2001-05-01 A nowadays science fiction in the Jules Verne style on science unusual characters ecological social and spiritual concerns

Lives of the Planets Richard Corfield, 2007-08-01 *Lives of the Planets* describes a scientific field in the midst of a revolution Planetary science has mainly been a descriptive science but it is becoming increasingly experimental The space probes that went up between the 1960s and 1990s were primarily generalists they collected massive amounts of information so that scientists could learn what questions to pursue But recent missions

have become more focused Scientists know better what information they want and how to collect it Even now probes are on their way to Mercury Venus Mars and Pluto with Europa one of Jupiter s moons on the agenda In a sweeping look into the manifold objects inhabiting the depths of space Lives of the Planets delves into the mythology and the knowledge humanity has built over the ages Placing our current understanding in historical context Richard Corfield explores the seismic shifts in planetary astronomy and probes why we must change our perspective of our place in the universe In our era of extraordinary discovery this is the first comprehensive survey of this new understanding and the history of how we got here

Nibiru Rising, the Lost Planet of Sumerian Gods Ryan Moorhen, 2025-08-28 Across the clay tablets of Mesopotamia a name appears like a cipher from the stars Nibiru the Planet of the Crossing To the ancients it was not merely a celestial body but a threshold a cosmic judge presiding over the rise and fall of ages From the Enuma Elish to the councils of the Anunnaki from Babylonian ziggurats to modern telescopes searching for Planet Nine Nibiru has always stood at the crossroads of myth and astronomy fear and revelation Nibiru Rising journeys deep into this mystery It traces the story of Nibiru from its first appearance in Babylonian creation myths through its echoes in flood legends and divine councils into its modern rebirth as Planet X and a symbol of apocalyptic prophecy Along the way it explores how ancient sky watchers may have encoded knowledge of long celestial cycles precession eclipses comets into temples myths and rituals anticipating the return of a hidden world that brings transformation whenever it crosses near Blending ancient history comparative mythology and the latest astronomical debates this book reveals how the memory of a single enigmatic planet has shaped civilizations for thousands of years Was Nibiru a literal body beyond Neptune a lost piece of cosmic architecture or a symbolic key to understanding time itself Whether read as prophecy science or myth its legacy is undeniable In a world where the past and future seem to meet in the stars Nibiru Rising asks are we once again standing at the crossing *The Cosmic War* Joseph P. Farrell, 2020-12-05 There is ample evidence across our solar system of cataclysmic and catastrophic destruction events The asteroid belt for example may be the remains of an exploded planet The known planets are scarred from incredible impacts and teeter in their orbits due to causes heretofore inadequately explained Rejecting the naturalist and materialist assumptions of catastrophism forwarded by other researchers Farrell asserts that it is time to take the ancient myths of a Cosmic War in the heavens seriously Incorporating extraterrestrial artifacts cutting edge ideas in contemporary physics and the texts of ancient myths into his argument Farrell maintains that an ancient interplanetary war was fought in our own solar system with weapons of extraordinary power and sophistication In doing so he offers a solution to an enigma that has long mystified researchers disclosing a cause of that ancient war the means by which it was waged and the real nature of the secret technology behind the ancient Tablets of Destinies It is all here folks The history of the Exploded Planet hypothesis and what mechanism can actually explode a planet The role of plasma cosmology plasma physics even plasma paleophysics and scalar physics The ancient texts telling of such destructions from Sumeria Tiamat s destruction by Marduk Egypt Edfu and the Mars connections Greece Saturn s role in the War of the Titans and the ancient Americas [History of the Inductive Sciences](#) William Whewell, 2023-11-19 Reprint of the original first published in 1875 [History of the Inductive Sciences](#)

William Whewell, 1863 *Probing Deep Space* Giles Sparrow, 2006-12-15 Explores how current data helps explain various phenomena and describes the theories and practical methods that may help unravel future cosmic questions as they arise
