Situations And Speech Acts:

Situations and Speech Acts David A. Evans, 2016-11-18 First published in 1985 this book aims to develop an approach to speech acts that has the virtue of being straight forward explicit formal and flexible enough to accommodate many of the more general problems of interactive verbal communication The first chapter introduces situation semantics with the second addressing the assumptions implied by the problem of representing speaker intentionality The third chapter presents a streamlined theory of speech acts and the fourth tests the predictions of the theory in several hypothetical discourse situations A summary and suggestions for further research is provided in chapter five and appendices facilitate reference to key concepts

Situations and Speech Acts David Andreoff Evans, 2016 **Situations and Speech Acts** David Andreoff Evans, 1981 **Situations and Speech Acts** David Andreoff Evans, 1981 *Speech Act Theory and Pragmatics* John Searle, F. Kiefer, M. Bierwisch, 2012-12-06 In the study of language as in any other systematic study there is no neutral terminology Every technical term is an expression of the assumptions and theoretical presuppositions of its users and in this introduction we want to clarify some of the issues that have surrounded the assumptions behind the use of the two terms speech acts and pragmatics The notion of a speech act is fairly well understood The theory of speech acts starts with the assumption that the minimal unit of human communication is not a sentence or other expression but rather the performance of certain kinds of acts such as making statements asking questions giving orders describing explaining apologizing thanking congratulating etc Characteristically a speaker performs one or more of these acts by uttering a sentence or sentences but the act itself is not to be confused with a sentence or other expression uttered in its performance Such types of acts as those exemplified above are called following Austin illocutionary acts and they are standardly contrasted in the literature with certain other types of acts such as perlocutionary acts and propositional acts Perlocutionary acts have to do with those effects which our utterances have on hearers which go beyond the hearer's understanding of the utterance Such acts as convincing persuading annoying amusing and frightening are all cases of perlocutionary acts

Chiba University in Japan Handbook of Teaching and Learning Persian as a Second Language Hooman Saeli, 2025-09-26

This collection explores relevant pedagogical and sociolinguistic topics in the teaching and learning of Persian as a foreign and second language. Owing to the dearth of research in many areas pertaining to the teaching and learning of Persian, this handbook provides empirically supported insights into various aspects of these areas. While the literature on teaching and learning Persian is growing, the field lacks a cohesive collection on Persian as a foreign second language. The book addresses issues pertaining to the standardization and validation of teaching and assessment methods which remain under explored in the contexts of teaching and learning Persian. It also covers the teaching of Persian pragmatics, the use of corpora as well as a range of different areas within linguistics including phonetics, prosody and historical linguistics. This comprehensive collection contributes substantially to the scientific study of many aspects of teaching and learning Persian which have been neglected for decades. A must have text in Persian language pedagogy and Persian sociolinguistics, it is an essential book for those in teaching and learning in Persian language programs worldwide.

The Pragmeme of Accommodation: The Case of Interaction around the Event of Death Vahid Parvaresh, Alessandro Capone, 2017-06-02. This volume brings together a wide array of papers which explore among other things to what extent languages and cultures are variable with respect to the interactions around the event of death. Motivated by J. L. Mey's idea of the pragmeme, a situated speech act, the volume has both theoretical and practical implications for scholars working in different fields of enquiry. As the papers in this volume reveal, despite the terminological differences between various disciplines, the interactions around the event of death serve to provide solace not only to the dying but also to the family and friends of the deceased, thus helping them to accommodate to the new state of affairs.

Essays in Speech Act Theory Daniel Vanderveken, Susumu Kubo, 2002. Any study of communication must take into account the nature and role of speech acts in a broad context. This book addresses questions such as: What do we mean? How do we say it? and How is it understood in the broad context of universal socio-cultural and psychological issues that bear on human communication. It presents an overview of current issues in speech act theory that are at the center of human and social sciences dealing with language, thought and action, building on John Searle's famous article 'How Performatives Work' included in this book. The contributions by linguists, psychologists, computer scientists and philosophers thus address issues of communication that are crucial in conversation analysis, cognitive science, artificial intelligence, psychology and philosophy, and a general understanding of how we communicate. The book is suitable for courses with an extensive bibliography for further reading and an Index.

The SAGE Handbook of Sociolinguistics Ruth Wodak, Barbara Johnstone, Paul E. Kerswill, 2011. This Handbook answers a long standing need for an up to date comprehensive international in depth critical survey of the history, trajectory, data, results and key figures involved in sociolinguistics. The result is a work of unprecedented coverage and insight. It is all here from the foundational contributions to the field to the impact of new media, new technologies of communication, globalization, trans border fluidities and agendas.

become aware of their existing mental constructs through multiple reflection tasks and discussion questions Each chapter provides focusing questions The systematic chapter structure scaffolds the readers understanding of the concepts explored which include communication strategies interactive and non interactive listening speaking anxiety accentuatedness and intelligibility and much more Through its companion website this book provides access to resources that enable readers to continue their own professional development as teachers of listening and speaking in second and foreign language contexts

The Functional Perspective on Language and Discourse María de los Ángeles Gómez González, Francisco José Ruiz de Mendoza Ibáñez, Francisco González García, Angela Downing, 2014-05-15 Over the last forty years the functionalist approach to linguistic description and explanation has given rise to several major schools of thought that share two crucial assumptions i form is not independent of meaning function or language use and ii linguistic description and explanation need to take into account the communicative function of language This volume offers readers interested in functional linguistics a selected sample of studies that jointly prove the efficacy of the analytical tools and procedures broadly accepted within the functionalist tradition in order to investigate language and discourse with special focus on key pragmatic discourse notions such as contextualization grammaticalisation reference politeness in directness discourse markers speech acts subjective evaluation and sentiment analysis in texts among others In addition this volume offers specific corpus based techniques for the objective contextualisation of linguistic data which is crucial given the central role allotted to context in both functional linguistics and pragmatics discourse analysis

Human Machine Interaction Denis Lalanne, Juerg Kohlas, 2009-03-27 Human Machine Interaction or more commonly Human Computer Interaction is the study of interaction between people and computers It is an interdisciplinary field connecting computer science with many other disciplines such as psychology sociology and the arts The present volume documents the results of the MMI research program on Human Machine Interaction involving 8 projects selected from a total of 80 proposals funded by the Hasler Foundation between 2005 and 2008 These projects were also partially funded by the associated universities and other third parties such as the Swiss National Science Foundation This state of the art survey begins with three chapters giving overviews of the domains of multimodal user interfaces interactive visualization and mixed reality These are followed by eight chapters presenting the results of the projects grouped according to the three aforementioned themes

Doing What Comes Naturally Stanley Fish, 1989 In literary theory the philosophy of law and the sociology of knowledge no issue has been more central to current debate than the status of our interpretations Do they rest on a ground of rationality or are they subjective impositions of a merely personal point of view In Doing What Comes Naturally Stanley Fish refuses the dilemma posed by this question and argues that while we can never separate our judgments from the contexts in which they are made those judgments are nevertheless authoritative and even in the only way

that matters objective He thus rejects both the demand for an ahistorical foundation and the conclusion that in the absence of such a foundation we reside in an indeterminate world In a succession of provocative and wide ranging chapters Fish explores the implications of his position for our understanding of legal literary and psychoanalytic interpretation the nature of professional and institutional culture and the place of reason in a world that is rhetorical through and through Publisher description
