

Daddy-long-legs Spiders

Appearance:

As their name suggests, these spiders have extremely long legs that are five times longer than their bodies. They are mostly cream to pale brown in colour.

Habitat:

These spiders can be found in every continent except for Antarctica. They like to build their homes in dark, damp areas, including under rocks, in caves, and in cellars.

Danger:

Don't believe the myths – though their fangs are small, these spiders are capable of piercing human skin. However, they are generally non-aggressive to humans.

Bite:

A bite from this spider typically only induces a short-lived stinging sensation. If bitten, clean the bite site with soap and water, apply a cold compress, and watch for deterioration.
