The Environmental Imagination Dean Hawkes,2019-11-07 The Environmental Imagination explores the relationship between tectonics and poetics in environmental design in architecture Working thematically and chronologically from the eighteenth century to the present day this book redefines the historiography of environmental design by looking beyond conventional histories to argue that the environments within buildings are a collaboration between poetic intentions and technical means In a sequence of essays the book traces a line through works by leading architects of the nineteenth and twentieth centuries that illustrate the impact of new technologies on the conception and realisation of environments in buildings In this a consideration of the qualitative dimension of environment is added to the primarily technological narratives of other accounts In this second edition the book has been substantially rewritten and restructured to include further research conducted in the decade since the first edition A number of important buildings have been revisited in order to extend the descriptions of their environments and studies have been made of a number of newly studied significant buildings A completely new essay offers an environmental interpretation of Luis Barragán's magical own house in Mexico City and the earlier studies of buildings by Peter Zumthor have been gathered into a single extended essay that includes a body of new research On the fiftieth anniversary of the publication of Reyner Banham's *The Architecture of the Well tempered Environment* the book concludes with a critical tribute to that seminal text The Environmental Imagination will appeal to academics and practitioners with interests in the history theory and technology of architecture **Architecture and the After-life** Howard Colvin, Emeritus Fellow St John's College Howard Colvin,1991-01-01 The Pyramids and the Taj Mahal are witness to the extravagant architectural tributes that throughout human history the great and the wealthy have paid to their

dead In this book a well known architectural historian provides a history of funerary architecture in western Europe from the earliest megalithic tombs of prehistory to the establishment of public cemeteries in the nineteenth century With sensitivity and wit Howard Colvin traces the ways in which these structures represent changing ideas about the after life as well as changes in architectural style *Soane and After* Dulwich Picture Gallery,1987 *Romanticism and the Museum* E. Peacocke,Mo Malek,2014-11-25 Romanticism and the Museum argues that museums were integral to Britain s understanding of itself as a nation in the wake of the French Revolution It features Wordsworth Scott Edgeworth and literary periodicals featuring Byron and Horace Smith The Architects and Architecture of London Kenneth Allinson,2008 The guide explains why London is the way it is It helps you link the historical and contemporary into a single pattern of significant places spaces and buildings It highlights old and new as a lively and vibrant pattern of on going creative activity rooted in established urban patterns **Architectural History** ,2010 **The Art Museums of Louis I. Kahn** Patricia Cummings Loud,Louis I. Kahn,1989 **Civilizing Rituals** Carol Duncan,2005-06-20 Illustrated with over fifty photos Civilizing Rituals merges contemporary debates with lively discussion and explores central issues involved in the making and displaying of art as industry and how it is presented to the community Carol Duncan looks at how nations institutions and private individuals present art and how art museums are shaped by cultural social and political determinants Civilizing Rituals is ideal reading for students of art history and museum studies and professionals in the field will also find much of interest here *Glorious Visions* Helene Furján,2011-05-05 Strongly interdisciplinary in its scope this book situates Soane s house museum within the broader context of early nineteenth century British aesthetics theories of taste and cultural currents viewing it as a cultural and artistic product as well as an architectural and museological one **Exchanges between Literature and Science from the 1800s to the 2000s** Márcia Lemos,2017-03-07 This collection of essays responds to the intense interest that the relations between the discourses of literature and other cultural practices and those of science have obtained throughout various fields of study Spanning a period between the mid nineteenth century and the twenty first century the work collected here is firmly focused on the cultural significance of scientific discoveries and practices and especially on the manifold representations of science and scientists in literature and the arts Its four sections develop from an initial moment of dwindling indefiniteness of borders between literature and the sciences to the historical perception of an increasing divide between the two cultures to use C P Snow s influential expression as well as calls for a form of convergence or consilience in Edward Wilson s words The final section turns to the medical sciences a porous scientific discipline in relation to the humanities which suggests that consilience can already be found partially in specific areas As such this collection contributes towards critically extending that integration through the discussion of key literary representations of science its promises and its problems Museum Architecture Suzanne MacLeod,2013-04-12 Recent decades have witnessed an explosion of museum building around the world and the subsequent publication of multiple texts dedicated to the subject Museum

Architecture A new biography focuses on the stories we tell of museum buildings in order to explore the nature of museum architecture and the problems of architectural history when applied to the museum and gallery Starting from a discussion of the key issues in contemporary museum design the book explores the role of architectural history in the prioritisation of specific stories of museum building and museum architects and the exclusion of other actors from the history of museum making These omissions have contemporary relevance and impact directly on the ways in which the physical structures of museums are shaped Theoretically the book places a particular emphasis on the work of Pierre Bourdieu and Henri Lefebvre in order to establish an understanding of buildings as social relations the outcome of complex human interactions and relationships The book utilises a micro history an in depth case study of the National Gallery of the North the Walker Art Gallery in Liverpool to expose the myriad ways in which museum architecture is made Coupled with this detailed exploration is an emphasis on contemporary museum design which utilises the understanding of the social realities of museum making to explore ideas for a socially sustainable museum architecture fit for the twenty first century Modern Architecture and Design Bill Risebero,1983 British architect and planner Bill Risebero recreates 200 years of modern architecture and design against a backdrop of class dominance over rising industrialism The lively and opinionated text and more than 1 000 captioned drawings by the author provide a refreshing reinterpretation of architectural developments in the modern period Modern Architecture in Europe Dennis J. De Witt,Elizabeth R. De Witt,1987
