Social And Present Day Questions:

The Esoteric Aspect of the Social Question Rudolf Steiner, 2013-05-14 Although recent years have seen major advances in science and technology the social aspect of life still presents major problems for western societies The general increase in destructive antisocial behaviour over past decades has raised the profile of social issues yet effective ideas to tackle the difficulties are often nowhere to be found Many decades ago Rudolf Steiner suggested new ways of organizing society and engaging with social questions This book presents his inner esoteric perspective on such concerns The starting point asserts Steiner must be the proper valuing of the human element in the world and a deeper understanding of its relation to nature and the cosmos The organization of society cannot be made in an arbitrary way but should reflect the relationship of human beings to the spiritual world Steiner goes on to discuss the threefold archetype of social life the political state economics and the spiritual cultural aspect and how these can interact in a healthy way leading to a vibrant evolving society These popular lectures originally published as *The Inner Aspect of the Social Question* appear here in a new translation and with the addition of a previously unpublished lecture

The Woman Question: Social issues Elizabeth K. Helsinger, Robin Ann Sheets, William R. Veeder, 1983

The Approach to the Social Question Francis G. Peabody, 1909

The Social Question in the Global World Ewa Bogalska-Martin, Emmanuel Matteudi, 2018-04-18 In an era of rapid globalisation how can the changes that characterise how the social question is addressed in rich and emerging countries be analysed How can one interpret the crisis in the Welfare State and the emergence of new social policies that push for the financial contribution of beneficiaries and the development of new forms of solidarity What can be said about the world's poorest countries and their recurrent difficulty in benefiting from international aid to fight against poverty and ensure the protection of all people This volume brings together 24 researchers from around the world to analyse a series of case studies of developed emerging and developing countries They study the evolution or decline observed in these countries and propose some answers to the issue of the way in which the economic model influences how the social question is taken into account around the world A closer look reveals that the manner in which this question is addressed largely determines how the evolution of the world is perceived While the contributors here highlight how capitalism makes it possible to reflect on the issue of social protection they also show the limits of policies unable to guarantee this protection as soon as the economic situation can no longer allow countries to bear its costs

Sociology in Question Professor Pierre Bourdieu, 1993-11-15 The works of Pierre Bourdieu occupy a central place in the current development of world sociology This volume offers an accessible but challenging introduction to Bourdieu's ideas In a series of discussions lectures and interviews the range of Bourdieu's ideas is laid out and its relation to other disciplines and other sociological schools is explored The issues developed include the sociology of culture leisure and taste the intrinsic reflexivity of social science and the role of language in society and social sciences

Janne Elo, Michael Uljens, 2024-04-13 This Open Access book addresses the theoretical grounding of the pedagogical dimensions of higher education leadership and its empirical study The book's general point of departure is that educational leadership is a multi level phenomenon operating as policy work on a transnational and national level as educational leadership on various organizational levels and as supervision and teaching on an interactional level It is in and through these discursive practices that policies are initiated interpreted translated and enacted The volume demonstrates how Non Affirmative Theory NAT of education applies to understanding and dealing with the pedagogical dimensions of the multi level and multi actor phenomena of HE leadership in a coherent manner It allows one to explore how the pedagogical scope of action at each level of leadership is framed or staged by the other levels as well as how actors at different levels utilise their scope The book starts out by exploring the pedagogical aspects of HE leadership as a multi level and multi actor phenomenon at a theoretical level It continues to discuss nation state HE in a global perspective and HE leadership in an organisational perspective Next the book looks at departmental leadership management and development Parallel with this the volume critically explores the non affirmative position itself by a contrasting dialogue with other theoretical approaches
