harmonious family with three generations living together and that this ideal family broke down under the impact of urbanization and industrialization. The essays in this volume challenge this myth and provide dramatic revisions of simplistic notions about change in the American family. Based on detailed research in a variety of sources including extensive oral history interviews of ordinary people, these essays examine major changes in family life, dispel myths about the past, and offer new directions in research and interpretation. The essays cover a wide spectrum of issues and topics ranging from the organization of the family and household to the networks available to children as they grow up, to the role of the family in the process of industrialization, to the division of labor in the family along gender lines, and to the relations between the generations in the later years of life. While discussing family relations in the past and revising prevailing notions of social change, these interdisciplinary essays also provide important perspectives on the present.

Social Dynamics of the Life Course Walter R. Heinz, Victor W. Marshall, 2003

In the last two decades, research on the life course has successfully combined and integrated different and rather isolated fields of social concerns such as the labor market, family, solidarity, education, employment, retirement, and social policy. It has also developed a special focus on crucial problems of sociological research which includes the understanding of micro-macro phenomena, the dynamics of social change, and international comparisons. Contributors to this volume take an international comparative approach in applying the life course theoretical framework to issues of work and career. Life course research focuses on the relationship between institutions and individuals across the life span and illuminates the impact of modernization on the shaping of biographies. Industrial service societies are characterized by historically new contingencies of living arrangements and biographies. These contingencies differ according to the extent to which life course patterns are regulated by social institutions. In the continental European context, institutional frameworks continue to define the timing and sequencing of transitions across the life course. In less regulated market societies like the United States and Great Britain, biographies and living arrangements are shaped more by the interaction of markets, social networks, and individual decisions. In active welfare states, institutional resources and rules continue to mediate the effects of social change on the life course. What the editors and contributors to this fine compendium anticipate is a change on the cultural level toward more equality. This trend supports young people and women in particular in their expectations concerning an egalitarian relationship. This expectation is not taken for granted from the point of view of the male partner but has to be negotiated in decision-making processes as an issue that concerns the couple as a unit. Thus, the way in which

people interact is profoundly impacted by the values and goals of equity demands Walter R Hein is professor of sociology and social psychology and director Graduate School of Social Sciences University of Bremen Victor W Marshall is professor of sociology and director of the Institute on Aging University of North Carolina at Chapel Hill Carolina *Social Change and Human Development* Rainer K Silbereisen,Xinyin Chen,2010-05-26 Today s world is characterized by a set of overarching trends that often come under the rubric of social change In this innovative volume Rainer K Silbereisen and Xinyin Chen bring together for the first time international experts in the field to examine how changes in our social world impact on our individual development Divided into four parts the book explores the major socio political and technological changes that have taken place around the world from post from the rapid upheavals in 1990s Europe to the gradual changes in parts of East Asia and explains how these developments interplay with human development across the lifespan Human Development and Social Change is a useful resource for students and researchers involved in all areas of human development including developmental psychology sociology and education Social Relations and the Life Course G. Hunt,2017-09-16 Dramatic social transformation in Western society over recent decades has had a profound impact on the way the life course is studied While people continue to experience the implications of class gender ethnicity and of course age they are more than ever able to take personal control of their own lives The Life Course considers how in a diverse and uncertain world the previously predictable stages of life are no longer fixed but increasingly open to change Focusing on continuities and change this book looks not only at the different phases of life but also at the transformation of a number of closely related social institutions such as the family education and the workplace Recognising that the established cradle to grave view is now outdated the trajectory from infancy and youth to later and end of life is followed not as a stable object of study but as a starting point for critical analysis This second edition offers an essential overview of the sociology of the life course incorporating both contemporary and conventional perspectives It calls upon current theorising around the life course as well as on up to date empirical research data This thought provoking text is relevant to researchers and students of life course studies and sociology as well as to those in nursing social work and related caring professions Social Change and the Life Course Matilda W.
