Clark, Noel Whiteside, 2003-11-20 Future pension provision is highly controversial it juxtaposes the challenges of old age security with the exigencies of global finance Clearly demography finance and public accountability are crucial to current political debate But there are other important issues The problems of paying for the retirement of the baby boom generation has exposed profound differences in the advanced economies in terms of their financial institutions and infrastructure Pension security has been re conceptualised in part as an issue of global finance and international comparative advantage bringing with it a re definition of risk and pension security This book examines how major continental European and Anglo American countries are dealing with these pressures to what extent these responses are beginning to redraw the boundaries between public and private responsibility for pension security and what the implications of public private partnerships are for the financial organisation and infrastructure of European and global financial markets and the nation based welfare state The contributors all involved in policy development in their respective countries assess the comparative strengths and weaknesses of recent pension initiatives in the light of continuing

fiscal constraints and current market instabilities Using a tight comparative framework the book questions assumed divisions between states and markets as new divisions between public and private spheres of pension responsibility require new regulatory machinery to guarantee future security This book provides a vital reference point in understanding pension security in the 21st century for academics and postgraduates in the social sciences economics and finance geography politics and social policy policy makers in OECD countries and industry professionals **European Social Security and Global Politics:Eiss Yearbook** European Institute for Social Security. Conference,2003-01-01 The twelve remarkable essays in this book explore this vital issue from a number of enlightening perspectives European Social Security and Global Politics represents a partial gleaning of the September 2001 conference held in Bergen Norway of the European Institute of Social Security a leading multidisciplinary research group and the vanguard of the debate on social security in Europe Fifteen highly committed researchers and administrators from all over Europe offer in depth analysis and conclusions in such crucial areas as how globalisation increases inequality and hinders redistribution of wealth how certain social security policies hamper the free movement of workers the elusive promise of regional social security in Europe essential elements of any proposed global social security policy various reform initiatives for the fair administration of pension schemes In addition to the invaluable individual insights advanced in each paper two notable trends seem to pervade the entire conference One is the growing divergence of social security policy within European countries coexisting uneasily with EU measures against social exclusion the other is the sudden clarity of principle and design in the European welfare state when seen against the virtual anarchy of the globalisation model Where these trends may lead us is only beginning to come into focus and this book is among the first to sharpen the images of the possible futures in European social security that are likely to emerge in the next decade All professionals in any aspect of social security policy or study will benefit enormously from this provocative book not only in Europe but throughout the world Social Security Pension Reform in Europe Martin S. markets are present in a growing number of countries around the world But despite their popularity policymakers continue to struggle with two key policy concerns On the one hand a number of design shortcomings encourages pension firms to charge high administrative fees On the other hand the global crisis that started in 2007 has reignited the debate on whether pension participants bear excessive investment risk Both are valid policy concerns as their incidence can imply higher than expected levels of poverty among old age individuals Both concerns have the same root problem the limited capacity of individuals to choose what is best for them This in turn stems from a combination of inadequate financial education bounded rationality and the use of simplistic rules of thumb that produce systematic biases in the decision making process of individuals While improving financial education is an obvious avenue to pursue this book is more concerned with design features that can exploit these systematic biases to protect consumers from themselves New Policies for Mandatory Defined Contribution Pensions Industrial Organization Models and Investment Products i discusses the main implications for the functioning of mandatory defined contribution pensions of consumers inability to make rational choices ii describes how jurisdictions have tried to address these problems through ad hoc policy interventions and iii proposes new policy directions in the areas of industrial organization models and investment products to address these concerns more effectively Written for practitioners and researchers around the world this book provides access to new thinking on mandatory defined contribution pension systems and it makes an important contribution to the on going policy debate on how to best structure mandatory defined contribution pillars

Labor Markets and Social Policy in Central and Eastern Europe N. A. Barr, 2005-01-01 Labor Markets and Social Policy in Central and Eastern Europe summarises social policy reform during the transition and EU accession and analyses the social policy challenges which continue to face both old and new member states Specifically the book amplifies two sets of arguments First social policy under communism was in important respects well suited to the old order and precisely for that reason was systematically badly suited to a market economy Strategic reform directions thus followed from the nature of the transition process and from constraints imposed by EU accession Secondly successful accession is not the end of the story economic and social trends over the past 50 years are creating strains for social policy which all countries old and new members will have to face This book will be of interest to readers interested in social policy particularly those with an interest in the process of post communist transition in EU accession and in future social policy challenges for the wider Europe It should be of interest to academics in departments of economics social policy and political science and to policy makers including government advisers and civil servants

Sustainability of Pension Systems in the New EU Member States and Croatia Leszek Kasek, Thomas Laursen, Emilia Skrok, 2008-02-01 This study finds that pension reforms in recent years have improved the efficiency and sustainability of pension systems in the new member states of the European Union and Croatia However for many countries these probably have not gone far enough to ensure long term sustainability given the aging of the population Reforms have included changes to Pay As You Go PAYG systems including increases in retirement ages not at least for women new benefit formulas and new indexation mechanism Some countries Latvia and Poland have further strengthened the link of contributions and benefits to the sustainability of the PAYG system through the introduction of national defined contribution accounts The link is strengthened also by moving to a point system which has been adopted by many of the countries Several countries have introduced a second private pension pillar funded through diversion of part of the pension contributions thereby diversifying risk However some countries in particular the Czech Republic Slovenia and Romania will need to do more to safeguard the long term viability of their pension systems while others face challenges to ensure equitable pension systems and adequate living standards for all elderly people
