Expanding Perspectives on Human Rights in Africa M. Raymond Izarali, Oliver Masakure, Bonny Ibhawoh, 2019-03-14 This book draws attention to emerging issues around the rights of minorities marginalized groups and persons in Africa It explores the gaps between human rights provisions and conditions showing that although international human rights principles have been embraced in the continent various minority groups and marginalized persons are denied such rights through criminalization and persecution African countries have a good record of signing and ratifying international and regional rights instruments but the political will and capacity for enforcing these with respect to minorities remain weak International contributors to the book provide new perspectives on the rights of marginalized and minority groups in different parts of Africa and the extent to which they are deprived or denied entitlement to the universality and equality articulated in law The authors show that human rights while having come of age as a moral ideal has not been fully entrenched in practice towards groups such as children indigenous populations the mentally ill persons with disabilities and persons with albinism This volume is geared toward scholars students human rights groups policy makers social workers international organizations and policy makers in the fields of criminology security studies development studies political science sociology children studies social psychology international relations postcolonial studies and African Studies

*IDA's Partnership for Poverty Reduction* Catherine Gwin, 2002-01-01 During its 40 year history the International Development Association IDA has worked to improve global welfare by allocating resources to growth and poverty reduction programs In 1990 a new framework for

IDA's poverty reduction efforts were created which resulted in significant structural change to its programs. The focus of the programs became one of labor intensive growth and expanded access to social services and safety nets to improve income levels among the poor. Additionally, the IDA agenda was expanded to include gender, the environment, and governance as facets of the poverty reduction framework. This report evaluates IDA's performance from 1994 through 2000 against the three specific replenishment commitments of the period. While finding the performance level only partially satisfactory, the review suggests ways to improve the effectiveness of IDA programs, replenishment process, and its ability to match corporate and country priorities. **Poverty and Health** DAC Network on Poverty Reduction, World Health Organization, 2003

Formal pension systems are an important means of reducing poverty among the aged. In recent years, however, pension reform has become a pressing matter as demographic aging, poor administration, early retirement, and unaffordable benefits have strained pension balances and overall public finances. Pension systems have become a source of macroeconomic instability, a constraint to economic growth, and an ineffective and/or inequitable provider of retirement income.
